An evaluation for developmental dyslexia or a language-learning disability is a comprehensive assessment that provides you with a clear understanding of your child's competencies in the following areas: oral language, phonological skills (e.g., phonemic awareness, rapid automatic naming), decoding, reading fluency, comprehension, spelling, and writing. Articulation skills, social skills, and/or oral motor difficulties may also be a part of the testing battery.

Our battery of assessments includes:

- Clinical Evaluation of Language Fundamentals, Fifth Edition (CELF-5) assesses receptive and expressive oral language skills
- Wechsler Individual Achievement Test, Third Edition (WIAT-III) assesses academic achievement.
- Test of Nonverbal Intelligence, Fourth Edition (TONI-4) assesses nonverbal intelligence in children and adults.

Depending on the student, this appointment can last 3 to 5 hours. A follow up meeting will be scheduled within two weeks with family to discuss results, go over diagnosis, outline recommendations for therapy, and school supports and accommodations.
