SHEPHERD-SHAMBURG CHAROLAIS & ANGUS

Private Treaty Bull Sale

OPEN HOUSE & SALE KICK-OFF

SATURDAY, FEBRUARY 25, 2023

NOON | COMPLIMENTARY LUNCH

1:00 PM | BID-OFF

Sale Location:

At the Farm | 1308 Quebec Ave | Stuart, IA 50250

From Stuart exit on I-80 (Exit 93):

3 miles south on Stuart Road. 4 miles west on 130th.

From Menlo exit on I-80 (Exit 88):

3 miles south on Pinewood Ave. 1 mile east on 130th.

How the Bid-Off Works:

All bulls will be listed for sale with a base price. Interested buyers can commit to the base price listed for the bull(s) they are interested in. If more than one buyer is interested in the same bull, a bid-off will take place at 1:00 PM on Saturday, February 25 until a winner is determined. Buyers need not be present to place bids but must be available by phone at 1:00 PM. Bulls with multiple buyers listed will sell first in catalog order. The bid-off will start with the Charolais bulls with Angus immediately following.

We will also have several individuals available sale day to take phone bids during the bid-off. If you purchase sight unseen, we have a 100% satisfaction guarantee.

If any bulls are still available, they will be sold privately on a first come, first serve basis after Kick-Off Day. Bulls are considered sold once payment has been received.

Sale Consultants:

Wes Chism | 281.761.5952

Donnie Leddy | 605.695.0113

Breed Representative:

Hadley Schotte, AICA (785) 562-6632

Videos:

All the bulls have been videoed. The videos can found on our website at www.ShepherdCharolais.com or YouTube channel approximately two weeks prior to the Open House and Sale Kick-off.

Trucking and Delivery:

Free Delivery on bulls within 250 miles or credit towards the first 250 miles. \$100 will be deducted from each bull if taken home sale weekend. This applies to purchases over \$3,500.

Health:

Charolais bulls have been semen tested and passed a breeding soundness exam. Angus bulls will be carcass scanned and semen tested mid-March. All bulls are virgin bulls unless otherwise noted. They will sell with proper health certificates and test for intrastate travel issued by Stuart Vet Clinic, Stuart, IA. They have been boosted with ViraShield 6 and poured with Cydectin. All the work has been done. They are ready to turn out and go to work for you.

Feeding & Care:

For your convenience, you can leave your bull here to continue to be developed until April 1st. This service is provided to customers free of charge for the base price listed on each bull. After April 1st, there will be a charge of \$4.00/head/day. We will do everything in our power to keep the bulls safe and healthy. However, once sold, they become the property and risk of the purchaser.

Dear Friends and Fellow Cattlemen,

You are personally invited to our Open House and Private Treaty Bull Sale Kick-off on Saturday, February 25, 2023.

Join us at the farm just outside of Stuart, IA. The bulls will be on display in this relaxed atmosphere for both our customers and the animals. It gives us the opportunity to visit with you and the opportunity for you to see the heart of the operation. Even if you aren't in the market for a bull this year, come join us for lunch, walk through the bulls, and see how the bid-off works.

With the third year of drought in our area and drought impacting much of the United States, feed prices are at a premium combined with high inflation and rising interest rates. We know, just like you, that the cows and calves in our herd must make money to pay the bills. Both the Angus and Charolais herds aren't pampered – they work for a living. You will find your bulls are the same way. Switching last year to a more forage-based ration for the bulls got good reports and we are liking the results we're seeing this year too. We cull the bottom and non-producing bulls and females striving to continually improve our herd and offering to you. We look for easy fleshing, low maintenance, good feet and structure, and good disposition, along with fertility, good udders, and mothering ability in our females. While we know there is a lot of hard work involved with calving and herd management, they should "do it on their own" as much as possible to make the rest of our job a bit easier. Striving for this in our herds translates to success for you in yours.

We are honored that you have chosen to look at and consider the bulls in our sale. The sale doesn't end when we deliver the bulls. The relationships we have with each one of you is what is really important. We enjoy seeing you, chatting about your family; life and cattle; hearing how the bulls and calves are doing; getting pictures and staying in touch. We enjoy the pictures and updates we have gotten this past year.

You are always welcome to stop by to see the bulls. They are penned, tagged and are available to be evaluated at any time. We are always happy to have visitors.

Please don't hesitate to contact either of us if we can be of any help with your bull selection. We look forward to doing business with you.

See you on February 25th!

Sara and Dan

Bull Guarantee:

All bulls are guaranteed to be fertile and come with a one breeding season guarantee. This applies to reproductive soundness and feet. Breeding season is defined as 90 days following the first turn out of the bulls. Please notify us as soon as possible when an injury occurs. Injuries must be examined by a veterinarian. If a suitable bull is available for replacement, we will replace the bull. If there is no replacement available, you will be given sale credit at our next sale towards the purchase of a replacement bull minus salvage value.

Supplement Sheets:

We will have supplement sheets available on our website Thursday before the Kick-Off. Charolais will include scrotal measurements, carcass data, frame scores, and current weights. Angus will include yearling data. This information can also be emailed or faxed upon request.

Base prices will be available upon request in the same time frame.

Standout is the only way to describe this bull. Top weaning weight of the fall group of bulls. He has the look, structure, feet, disposition, and pedigree to make a great herd bull. Out of Fargo who has made a name for himself and whose progeny is looked for in purebred and commercial circles. Skywalker's dam is making a name for herself in the herd. We kept her first son to use as a clean-up bull on heifers with great success. Her dam sold in our inaugural female sale to Summit Farms. She has a beautiful udder, teats, and milks like crazy.

Looking for calving ease and style? This bull will work good in a purebred or commercial operation on cows or heifers. He had the lowest birthweight in the fall group. A full sister sold in our inaugural female sale to Runft Charolais, Scandia, KS as a bred heifer. She and her calf, out of SAS Pendleton 9005, were the high sellers at Myron Runft's dispersal last fall.

Starting a new sire group - SAS Pendleton 9005, is a home-raised AI sire who was the high seller and sold to Bar J Charolais, Larry Ludeke, TX in our 2020 sale. We've used him the last couple years on our heifers and a few select cows. He's a Fargo son out of a consistent cow, 406, who continues to raise calves that come easy, have small birthweights, and gain. Pendleton continues to carry on these traits.

JMAR Benaiah was a new sire we used AI last year. This was the only bull calf but he's a standout. His dam was 13 years old last year. Sticking AI almost every year with a perfect udder, she stayed around for a reason. His weaning weight was the first time she showed her age. He's more than caught up since weaning. You'll see this sire group again next year as we continued to use Benaiah AI to offer some outcross genetics and high quality carcass traits.

Wow! He sure tipped the scale at weaning! Boy does he look impressive too! Watt has done it again with this knockout herd sire prospect. His dam is out of one of our best cow families and is sired by a full brother to another standout cow family in our herd. If you're looking for similar genetics, check out Lot 8 in the fall group.

USING EPDs FOR SELECTION:

Cattle Evaluations use the term Expected Progeny Differences (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait relative to other sires in the analysis. The key word is "difference". The EPD itself does not imply "good" or "bad" performance. But rather, the EPD gives a prediction of the average difference to expect in the performance of a sire's progeny relative to other sires in the same analysis.

CHAROLAIS BREED AVERAGE EPDs:

2023 Scholarship Recipient

AVA RECTENBAUGH, BRIDGEWATER, IOWA

What I'm doing now:

I'm currently studying at SWCC in Creston to get my gen-eds out of the way. This next fall I will be transferring over to Northwest Missouri State to finish out my last two years of college to be an Ag teacher.

Why I chose Charolais and what I've learned raising them:

I chose Charolais mainly because I wanted to mix things up a little bit in my family's herd. My family raises Black and Red Angus and I wanted some diversity. So I chose Charolais despite my family never raising them before.

What I've learned while raising them is that they definitely are my favorite breed because of all their traits. I love the added size at weaning and the natural docility I see in all my cows. I have also learned a lot about management and decision making these past few years during calving and when doing preg checks. When it is your own cows vs. your family's cows, an open cow is more than just a big 'O' on the list. Then you have to decide how valuable the cow is to you and if she's worth holding over till next year.

Starting in 2023, a \$1,000 scholarship will be awarded to a high school senior or college student. To be eligible, applicants or their parents must have purchased a female or bull from Shepherd Charolais in the last 5 years. Scholarship will be awarded annually at our Bull Sale. Watch for more information and application on our website for 2024.
