

SHEPHERD CHAROLAIS & ANGUS  
*Private Treaty Bull Sale*

OPEN HOUSE  
SATURDAY, MARCH 21, 2026

**DVAuction** At the Ranch, Stuart, Iowa  
Noon - Lunch | Bid-off 1 PM

# SHEPHERD CHAROLAIS & ANGUS

## Private Treaty Bull Sale

OPEN HOUSE & SALE KICK-OFF

SATURDAY, MARCH 21, 2026

NOON | COMPLIMENTARY LUNCH

1:00 PM | BID-OFF

### SALE DAY PHONES:

Sara Shepherd | 515.321.6870 | letter2sara@gmail.com

Dan Shamburg | 402.880.5179

Cara Caltrider | 641.247.0334 | CCR Cattle Co.

CJ Rochholz | 641.740.1609

Joelle Grubbs | 641.740.7739

### SALE LOCATION:

At the Farm | 1308 Quebec Ave | Stuart, IA 50250

### HOW THE BID-OFF WORKS: **DVAuction**

The Bid-Off will take place online through [www.DVAuction.com](http://www.DVAuction.com). Several individuals will be available to place bids for individuals in-person or over the phone.

Bidding Opens – Friday, March 20 at Noon

Bidding Closes – Saturday, March 21 at 1:00 PM CST with a horse race finish.

*(Please see the DVAuction.com pages in the back of the sale book for a description how the auction works and a horse race finish.)*

Bulls purchased sight unseen come with a 100% satisfaction guarantee upon delivery. If any bulls are available after the kick-off day, they will be sold privately on a first come, first serve basis. Bulls are considered sold once payment has been received.

### VIDEOS:

All the bulls have been videoed. The videos can be found on our website at [www.ShepherdCattle.com](http://www.ShepherdCattle.com) or DVAuction approximately two weeks prior to the Open House and Sale Kick-off.

### SALE REPRESENTATIVES:

Hadley Schotte, AICA | 785.562.6632

Wes Chism | 281.761.5952

Donnie Leddy | 605.695.0113

### DELIVERY:

Free Delivery on bulls within 250 miles or credit towards the first 250 miles. \$100 will be deducted from each bull if taken home sale weekend. This applies to purchases over \$5,000. Bulls will be delivered in April.

### HEALTH & TESTING:

Both Charolais and Angus bulls have been semen tested and passed a breeding soundness exam prior to the sale. All bulls are virgin bulls. They will sell with proper health certificates issued by Stuart Vet Clinic, Stuart, IA including a negative Trich test. They have been boosted with ViraShield 6 and poured with Cydectin. All the work has been done. They are ready to turn out and go to work for you.

### FEEDING & CARE:

For your convenience, you can leave your bull here to continue to be developed until May 1st. This service is provided to customers free of charge for the base price listed on each bull. After April 1st, there will be a charge of \$6.00/head/day. We will do everything in our power to keep the bulls safe and healthy. However, once sold, they become the property and risk of the purchaser.

Dear Friends and Fellow Cattlemen,

You are personally invited to our Open House and Private Treaty Bull Sale Kick-off on Saturday, March 21, 2026.

As I write this between sale preparations and calving checks with the long days and late nights this time of year, I'm reminded of why I do this. It's for the customers, now friends, that have been made and success stories of those impacted through my herd. Your success is our success. This year's set of bulls may be smaller than the last few years due to a large heifer crop but WOW, is it impressive! Hopefully it will bring you lots of future success. Be sure to tell us about it!

We've tried to continue to improve the product offered to you, our customer. DNA samples were sent in on all Charolais bulls this year. This means sires have been verified, enhanced EPDs are available, and genetic conditions tested for. We had a hiccup at the lab with the yearling group so their enhanced EPDs won't be available until April 1st. We are also starting this on our females so parentage and EPDs will be even more accurate in the future.

This year the bid-off is moving to an online format through DVAuction. This change was made in hopes of bringing more flexibility to our customers by offering another avenue to bid. Our Open House with complimentary brisket lunch will continue with in-person bidding and watch party when the sale closes at 1:00pm. We hope you'll join us. Please contact us if you have any questions about this new format.

Thank you for looking at and considering putting one of our bulls to work for you.

I look forward to working with you!

Sara

### BULL GUARANTEE:

All bulls are guaranteed to be fertile and come with a one breeding season guarantee. This applies to reproductive soundness and feet. Breeding season is defined as 90 days following the first turn out of the bulls. Please notify us as soon as possible when an injury occurs. Injuries must be examined by a veterinarian. If a suitable bull is available for replacement, we will replace the bull. If there is no replacement available, you will be given sale credit at our next sale towards the purchase of a replacement bull minus salvage value.

### ULTRASOUND AND PERFORMANCE INFORMATION:

Carcass Ultrasound Data, Yearling Data, and Scrotal Measurements will be available on a supplement sheet prior to the Kick-off. These will be posted on our website. It can also be emailed or faxed upon request.

It was hard to pick which bull to start the catalog with out of this deep group of fall born bulls. Pounds pay and this guy will pack them on! AI calving ease sire blended with a 7-year-old performance dam out of Silver Gun gives you a nice well-rounded package. If you're producing feeder calves or females, this bull has the ability and pedigree to do it all. *Retaining 25% semen interest.*

An ET calf with the Ledger x Grid Maker x Clarice mating is a no miss mating. I've offered full brothers to this bull in the past, have used one as a herd bull, and have females in the herd that always rise to the top. He's the longest-bodied and the largest framed in the group. Check out his performance and carcass EPDS and wow a TSI in the top 4% of the breed. He'll do a great job.

This bull was purchased on the side of his first-calf-heifer dam as a calf and raised here since he was about a month old. When I made the purchase, it was the intention of his dam going into the donor pen to flush and he was the coupon. The mating sure worked! He's knocking it out of the park from a phenotypic and numbers perspective. I probably should have pictured him with his clean lines and great look, but my crew would have gone on strike if I tried to do them all. Be sure to check out his video! *Retaining 25% semen interest.*

This bull kicks off an impressive group of bulls sired by our home-raised herd sire, SAS Cool Ledger 8010. His dam is a first-calf heifer out of legendary M6 New Standard and our 409 donor that was the 2nd high seller at the M6 Ranch Dispersal. She did a great job with her first calf. He's a smooth made looker who will catch your eye with all the right pieces.

Another top bull in the fall group – have I said this is a deep group? He's been a favorite of many who have looked at the bulls. Power and pounds are the best way to describe him. *Retaining 25% semen interest.*

**SAS COOL LEDGER 8010**  
SIRE OF LOTS 4-6 AND 15-17

Our home-raised herd sire, SAS Cool Ledger 8010 and his dam 582 will leave a lasting legacy on our herd. The sons in this offering make it easy to see why (Lots 4-6 and 15-17). 8010 was the first calf 582 had and was originally kept to use as clean-up on heifers. After a couple seasons, he got too big to use on heifers and was sold to a friend in NE to put on commercial cows.

Before he left, I had him collected because I liked what I was seeing from his limited progeny and wanted to use him AI. As his progeny started to produce themselves, I wish I'd never let him leave. Lucky for me, Dan got a call when the friend decided to sell his cows and we were able to buy him back. He's been used heavy in my AI program and naturally because I know he works. Now, at 8-years-old, he's once again at Hawkeye Breeders getting collected after being used in the fall herd because I ran out of my original inventory.

Heifer safe, calving ease specialist, great feet that have never been touched, calves have lots of vigor, growth and the fancy look. When a neighbor asked to borrow a bull to use on a show heifer and 8010 stepped off the trailer he said he wasn't even going to be disappointed if she didn't stick AI.

His dam, 582, can be described in a very simple way... Fancy. That one word doesn't do this female justice. She was purchased as a bred heifer from the Southern Cattle Dispersal Sale shortly after her mother made waves as a high-selling lot in the M&M Dispersal. A phenotypic gem with performance to match. Her calves have had an average weaning ratio of 111. Every calf has ended up in the bull sale - with several high sellers - or female replacement pen. She has a wonderful disposition and great udder. She is a Sterling Dam of Distinction in the Charolais Breed. At 10 years of age, her final natural calf is Lot 29.

Here's another powerhouse of out a no-miss cow and our herd sire from Tri-N Charolais in Canada. Canadian Pride was selected for his legacy of maternal genetics featuring growth, milk, and longevity coupled with the famed Jehu sire described as stout, big barreled, massive white bull who sold for \$250,0000 Canadian dollars in the Tri-N Dispersal. 2467 is large framed with lots of power and a deep, soggy middle. He's backed by a dam with four generations of donors and who is headed to our donor pen herself. *Retaining 25% semen interest.*

The only Watt son in the fall group has a bit of a different pedigree. He's out of an ET female sired by Sparrows Braxton, the high selling bull in 2016 in Canada for \$106,000 known for his growth, correctness, and great temperament. High Country combines the Full-French bloodlines of Watt; the female maker Blue Value; Canadian influence of Braxton, and DeBruycker royalty in his donor granddam. He's a bull that is stout, thick-made, and has excellent growth and carcass traits.

Another outstanding Pendelton son out of a first calf heifer. I've been admiring these two half brothers as they've grown and developed. Their growth, presence, and look sure do catch my eye in the pen as you can see from both their pictures. 2508's maternal grandsire, JMAR Benaiah, was used AI as a performance-based herd sire to combine with the stylish and well-known K118 donor.

Ironically, the one we chose to picture from this sire group is a twin. The dam sure did a great job raising him!! Several individuals looking through the bull pen have been surprised to hear he was a twin. His dam is a large-framed Watt daughter. He'll be sure to put pounds on his calves and would make great females too.

The youngest 8010 son on the sale, he has all the right pieces. It's fun to watch him grow and develop. He has three generations of SAS females in his pedigree and goes back to one of the original cows from my dad when I started my herd in 2013. 212 is one of the few females his granddam 503 produced instead she had several high-selling bulls in some of my first sales.

This bull has an interesting pedigree in both his sire and dam. He is sired by Jubal, the first and only son of the now deceased Pleasant Dawn Chisum to sell in the US. In Canada, Chisum was a proven big spread bull with an elite top 1% for marbling. Jubal himself is deep flanked and soft made with a long, deep muscle pattern he passes on to his offspring. He easily and consistently stamps his offspring with performance, growth, frame and a great disposition. As daughters are coming into production, they are proving themselves to be excellent mothers with beautiful udders.

The New Germaine 608 donor is a whale of a cow! She has a ton of performance, dimension, a big middle and is easy on the eyes. She's a full sister to the noteworthy 484 female who topped the M6 Ranch Dispersal at \$36,000 who has produced several impressive offspring including SVY Ms Germaine 236K, a donor for Lindskov LT Ranch and SVY Historic 2421, now owned by Select Sires.

The Germaine family has made a huge impact on the breed. 608 was a herd favorite of Jerry Mullins when visiting from FL. A direct daughter sold to Rennert Ranch as a bred heifer where she had the privilege of entering their donor program at a young age. She is the kind of female that always produces good ones.

Hildago has been a standout since birth, packing the pounds on with his donor dam doing a great job raising this natural calf. He has the power of the Germaines and stamp of Jubal with the performance, carcass traits, and high TSI. Take a hard look at this one. *Retaining 25% semen interest.*

This bull was born last winter during a week of frigid temps. I'll never know why his dam decided to lay down and have him outside when the warm calving barn was feet away. She was too far advanced in her labor to move her inside but this guy got the trip to the warming box as soon as he hit the ground. His ears still got a little short but that hasn't stopped him. His dam goes back to one of our original herd sires, Big Flirt. He was a bull making machine! Unfortunately, he only left a few daughters in the herd but each one is GOOD including the dam of this bull. Great mothers, beautiful udders and dispositions with the growth, carcass traits, and frame passed along from Big Flirt. Paired with Jubal as a second calver you'll get a well rounded bull that will work great however he's used.

The calving ease Jubal brings to the table has been a pleasant surprise. I used him AI on most of my second-calf-heifers two years ago and you're seeing the results. The calving ease to performance spread from his sire was known for has carried through. You'll be able to put together a really nice group of like-sired calves with these Jubal sons.

MASSIVE is the best way to describe this bull. Southern was used for a few years in our herd. His sons were good but the females he produced are really rising to the top as is evidenced by the dam of True Grit. Cadillac Jack comes from the Wienk Charolais Ranch. He was purchased to use as a walking herdsire on our 2nd calvers to keep performance and good maternal traits the long-standing Wienk herd is known for. His offspring continue to be very consistent and has produced beautiful females that will stick around a long time. *Retaining 25% semen interest.*

This bull comes from the heart of Cara Caltrider's herd. She and her family have been long-time customers and good friends. She purchased some bred heifers from me to start her Charolais herd and a bull a few years ago when she worked for me during high school. You'll see many familiar names in this bull's pedigree on the top and bottom side - all Shepherd Charolais breeding.

He's a thick-made stout bull with a deep body. He's a stand-out with an eye appeal look that's easy to spot in the pen. Cara started to halter break this bull so he's also sure quite and easy to be around. *CRC Cattle Co is retaining 25% semen interest.*

Here's a powerhouse bull that reminds me of his sire, Watt, at this age. This is the last calf crop from Watt but he had a huge impact on our herd producing bulls customers sought after and his females are adding a strong foundation to our herd with great mothering ability, beautiful udders, and good milk. Add the Brenda cow family and maternal grandsire Silver Gun and you can see why this guy is a standout. His dam was in the donor pen for Cannon Charolais Ranch before we purchased her in their dispersal. She's made a name for herself here and will end up in our donor pen too. Look at his EPDs showing lots of growth, strong carcass traits and a TSI in the top 15%. Be sure to check out him sale day! *Retaining 25% semen interest.*

052 had a heifer with this same mating as her first calf. We liked the combo so much we decided to breed her again the same way. Legend may just be that. He has the calving ease to performance spread that is so easy to like in the Charolais breed. He's packed on the pounds and has the fancy look from Patriot, Outsider, and the Thomas 5604 donor. If you're looked for some chrome or to make clubby calves he'll catch your eye and has what it takes.

If you're looking for a heifer safe bull take a close look at this one. He's stacked with heifer bulls on both sides of his pedigree and single digit calving ease and birth weight EPDs. His first calf heifer dam did a good job with him and adds some look to him.

Final Charolais bull for this year and youngest Charolais in the offering. Unfortunately, we don't know who his sire is. DNA was sent in on all the Charolais bulls this year. Several were in the pasture and he hasn't matched to a sire. Rest assured he is purebred Charolais and will do a good job producing commercial calves.

Next up are two Dynamic sons who both trace back to the Jackson cow family. This bull and Lot 34 both trace back to the 1405 cow who has done an outstanding job in the herd. Look at the high WW, YW, and carcass numbers on this tank of a bull. Looking at this bull, we think you'll agree there's a reason he made the sale pen and was pictured.

This is one of those bulls that is hard to write footnotes about. His dam is a solid producer that does everything right but isn't flashy. His EPDs aren't anything super to brag about. However, he's made the tough cut because he's met the criteria to be a keeper and make the sale pen and he has the look to get himself pictured. I'd take a close look at him. He'll breed cows and might work the best when you get him home.

I had to do some arm twisting to convince Dan to keep the dam of this bull. She was out of the first calf crop after the herd was purchased from Rex Whillhelm. Only two bred heifers were kept that year and this was one of them because her dam, 511 is a Pathfinder. Boy am I sure glad I did that convincing! She's done an excellent job with every calf she's raised.

This bull is sired by another home raised son out of the Index 1665 bull that you'll see a lot in recent pedigrees and making a huge impact on the herd. Youngest in the offering, this bull combines two of the top cow families and should do an excellent job for his new owner.

# How to Use DVAuction, Inc

## DVAuction

www.DVAuction.com

### CREATE NEW ACCOUNT

Click 'Create New Account' on the homepage and fill out the form. Read the Terms and Conditions, and if you agree to the Terms, then accept the Terms and Conditions (click checkbox) and click Submit.

### ACTIVATE YOUR ACCOUNT

After successfully registering, you will receive an email with a link provided to activate your account. Click on the link, or copy and paste the link into your web browser. You must activate your account before you can login and view a sale.

### APPLY TO BID

There are several ways to apply for bidding. On the homepage, there will be a button for each upcoming event. There is also a 'Apply for Bidding' link available while viewing a sale.

### MAXIMUM BID

The maximum bid is the maximum amount a bidder is willing to pay for a lot. If two maximum bids of the same amount are placed for the same lot, the bid that was placed first will be accepted. If you have been outbid, you will receive an email and/or text informing you that you have been outbid. Your maximum bid can be raised at any time.

### EXTENSION TIME

If enabled, this is the amount of time after the last bid is placed before a lot will close (5 minute extensions). (Example: End time is 6:00 PM. A bid is placed at 5:58 PM, which causes the end time to extend to 6:03 PM. Another bid is placed at 6:01 PM, which causes the end time to extend to 6:06 PM. This will continue indefinitely until no bids have been placed for 5 minutes).

## FREQUENTLY ASKED QUESTIONS

#### Is the auction platform mobile friendly?

Yes, the auction platform and entire site is mobile friendly. So, no matter the device (computer, cell phone, tablet, etc) you are utilizing to view and/or bid on the auction. The site is responsive to your screen so you have the most optimum viewing and bidding experience.

#### Why is a credit card required to bid?

We require each user to post a credit card verification to ensure that each of our bidders is a valid, qualified bidder. This verification method has been implemented for the protection and security of each of our bidders. The credit card verification process is completely secure and PCI compliant.

#### How do I bid?

Select the Shepherd Charolais & Angus Bull Sale. When the bidding for the auction is open, you will have the opportunity to enter your bid (and your maximum bid) for each animal. Simply login to your user account and click on the Bid button for each lot to submit the bid(s).

#### How do I know if I am winning if there are no bidder numbers shown?

If you are watching the auction via a computer or via your mobile device, when you are winning the screen will show this message: You are winning! in green on the lot(s) you have the high bid on. If you get outbid, the message will change to: You have been outbid.

#### How do I know if I got outbid?

If you get outbid on any lot within an auction, you will receive a notification based on the preferences you set up in your user profile registration. There are two outbid notification preferences you could possibly receive – a text alert sent directly to your cell phone, or an email sent to your registered email address, or both! If you are watching the auction via a computer or via your mobile device, when you are outbid, the screen will show this message: You have been outbid. If you would like to bid again on that lot, simply click on the Bid button and Place a Bid.

## Using EPDs for Selection:

Cattle Evaluations use the term Expected Progeny Differences (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait relative to other sires in the analysis. The key word is "difference". The EPD itself does not imply "good" or "bad" performance. But rather, the EPD gives a prediction of the average difference to expect in the performance of a sire's progeny relative to other sires in the same analysis.

#### Charolais Breed Average EPDs:

CE	BW	WW	YW	MILK	MCE	MTL	SC	CW	REA	FAT	MARB	TSI
11.2	-1.3	64	116	25	9.4	57	1.1	27	0.73	0.015	0.15	270

#### Angus Breed Average EPDs:

CED	BW	WW	YW	MILK	CW	MARB	RE	FAT	\$W	\$G	\$B	\$C
6	1.2	68	120	27	56	0.78	0.71	0.020	65	57	155	268

## EPD DEFINITIONS:

**Calving Ease Direct (CE)** is expressed as a difference in percentage of unassisted births in first calf heifers. A higher value indicates greater calving ease.

**Birth Weight (BW)** The expected difference in average birth weight (pounds) of progeny. A lower value may be desired.

**Weaning Weight (WW)** The expected difference in average weaning weight of calves.

**Yearling Weight (YW)** The expected difference in average yearling weight of progeny.

**Maternal Milk (Milk)** The genetic ability of a sire's or dam's daughters to express in pounds of weaning weight in her calves.

**Calving Ease Maternal (MCE)** is expressed as a difference in percentage of unassisted births in first calf daughters. A higher value indicates greater calving ease.

**Total Maternal (MTL)** A value to predict the weaning weight performance of calves from a animal's daughters due to genetics for growth and maternal ability.

**Scrotal Circumference EPD (SC)** (expressed in centimeters) of a bull's or dam's male offspring at yearling.

**Carcass Weight (CW)** predictor of pounds of retail product at a constant age endpoint. Selection for increased values should result in heavier carcasses.

**Ribeye Area (REA)** a major component of the USDA yield grade equation and selection for increased ribeye area should result in larger ribeyes and lower yield grades between animals with the same carcass weight.

**Fat Thickness (FAT)** Fat thickness has a negative relationship to cutability; therefore, selection base on decreased fat thickness should result in lower yield grades and leaner cattle given the same age endpoint.

**Marbling Score (MARB)** selection for increased Marbling Score EPD should result in cattle with higher quality grades at the same age endpoints.

**Terminal Sire Index (TSI) - Charolais** represents a dollar index per terminal progeny produced for a bull in the AICA database, ranking them for profit potential.

**Weaned Calf Value (\$W) - Angus**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning.

**Grid Value (\$G) - Angus**, an index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B) - Angus**, a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid.

**Combined Value (\$C) - Angus**, an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B).
