# Company Background

- ▶ DDK Facilities Ltd was established in 2011 with the aim to provide electrical and associated facilities services, within both Industrial, Commercial and communications sector.
- ▶ At the time of the appointment of DDK Facilities Ltd, the two co-directors of the company had over 60 years combined experience within the communications industry, largely focussed on the installation and maintenance of AC and DC power systems and associated services, and both have worked on numerous projects worldwide, for national and international telecoms companies and organisations.
- ▶ Over the years, as our workforce and customer base has increased, we have expanded with the aim of providing electrical contracting and facilities services to new clients, both locally and nationwide.

# AC & Facilities Services

- ▶ Commercial and industrial electrical installations
- ▶ Supply and installation of electrical infrastructure
- ▶ Energy saving solutions (LED lighting, EV chargers etc)
- ▶ Electrical inspections and fixed wire testing
- ▶ PPM Procedures (thermal imaging, emergency lighting test, visual inspections)
- ▶ Area regeneration works with the supply of associated trades (builders works, plumbing, decoration etc)
- ▶ UPS installations (with DC batteries)
- ▶ Project Management

# DC Services

- ▶ UPS and DC (380-800 Volt DC) battery exchange programs
- ▶ DC (-54Volt) installations including “live” extensions and upgrades
- ▶ DC distribution circuit installations
- ▶ Provision and installation of DC distribution cubicles
- ▶ PPM on DC (-54Volt) power systems
- ▶ Battery load bank discharge testing (offline test)
- ▶ Battery health check including internal resistance measurements (online test)
- ▶ Project Management

# Client Base

DDK Facilities Ltd currently provide services to the following client base aswell as many more:

- ▶ **BT Global Services** - Installation of AC and DC distribution circuits. DC power system upgrades, battery exchanges. Site decommissioning works including removal of DC power systems, batteries and associated services with environmental disposal of equipment.
- ▶ **T James Electrical Ltd** - Project management, electrical contracting and labour supply. UPS, AC and DC power installations. Facilities supply to telecoms companies including Cold Aisle Containment (CAC), BMS services, Fire Alarm services, builders works, anechoic chamber installations. (EE/BT, Virgin Media, DSV, Stanley Black & Decker, Whistl)
- ▶ **Dale Power Solutions** - DC PPM procedures, online and offline battery testing and thermal imaging of AC distribution systems (Lumentech/Colt, Talk Talk)

# Client Base - cont.

- ▶ **Vertiv Infrastructure (UK)**- DC full installations and “live” upgrades to include commissioning of new and upgraded power systems. DC power system PPM's & battery testing. These works are on behalf of major telecoms companies (BT, BT/EE, Virgin Media, Telecom Italia, Vodafone, Alcatel etc)
- ▶ **Leadec Limited** - Electrical contracting, thermographic imaging, fixed wire testing, lighting upgrades, area regeneration works (Ford Motor Company, Bosch Rexroth, General Motors)
- ▶ **MLL Telecom Ltd** - Upgrades and electrical services to the RAN network to include AC and DC circuit supplies, DC power system installation and upgrades, mobile communications network upgrades (Vodafone, Virgin Media, Three)

# Previous and ongoing contract examples

- ▶ **Vertiv Infrastructure (UK)** - “Live” DC upgrade to 850+ systems on the PS2000 program and the Ericsson K86/K3/Robust infill program on the **BT Estate** (value circa £1.1m to date with further orders in place)
- ▶ **T James Electrical Ltd** - Full contract project management and facilitation of all works on the **EE/BT Estate** since April 2021, to include 40+ Cold Aisle Containment (CAC) installations, UPS distribution board installations, UPS upgrade works, Anechoic chamber installations with associated builders works, and general electrical lighting and power installations (contract value circa £1.2m to date with further orders in place)
- ▶ **Leadec Limited**- AC installations, emergency lighting upgrades, AC decommissioning works, thermographic testing **Ford Motor Company** (value circa £50k with further orders in place)
- ▶ **Dale Power Solutions** - DC PPM, battery online and discharge testing, thermal imaging to 300+ DC systems on **Lumentech/Colt** network (value circa £350k to date with further orders in place)
