

# Better information leads to better patient care.

When it comes to caring for patients, having a wealth of current, evidence-based information is essential to making better-informed decisions.

With the right tools, less time can be spent searching for the right information and more time can be spent on what matters-providing patients with the best care possible.

## Find evidence-based answers, anytime.

The best patient outcomes are the result of well-informed diagnoses and treatment plans. Finding answers from current, trusted journal articles, textbooks, and point-of-care references across medical specialties can help you make decisions based on the best evidence.

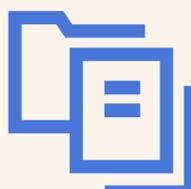

84%

of surveyed clinicians rate ClinicalKey's ability to provide trusted, current content as better than other clinical reference solutions they have used.<sup>1</sup>

92%

of surveyed clinicians find ClinicalKey to be effective for obtaining comprehensive, complete clinical information.<sup>2</sup>

80%

of surveyed clinicians rate ClinicalKey's ability to meet diverse content needs as better than other clinical reference solutions they have used.<sup>3</sup>

## Keeping up with best practices is key.

As technology and best practices continually evolve, staying on top of the latest developments can be a challenge. Access to a wide range of relevant resources, indexed daily, helps to maximize productivity.

76%

of surveyed clinicians rate ClinicalKey's ease of use as better than other clinical reference solutions they have used.<sup>4</sup>

75%

of surveyed clinicians report that they find answers they need 25% faster or more using ClinicalKey compared to other clinical reference resources.<sup>5</sup>

71%

of surveyed clinicians rate ClinicalKey's ability to save them time as better than other clinical reference solutions they have used.<sup>6</sup>

## Make the most of your time with patients.

When patients have questions, getting answers quick is important. With a comprehensive look at disease risk factors, clinical manifestations, and treatment information all in one place, you can search less and share more.

84%

of surveyed clinicians rate ClinicalKey's ability to help them increase care quality as better than other clinical reference solutions they have used.<sup>7</sup>

## Clinicians have experienced many benefits as a result of using ClinicalKey<sup>8</sup>, including:

Better, more informed clinical decisions

Reduction or prevention of unnecessary tests and treatment

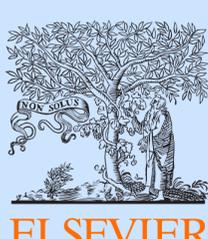

Better patient outcomes

Cost-efficient decisions regarding patient care

More time with patients as a result of getting quicker answers

Lead with answers.
