

**We've got you covered!**

# Full Circle Retreats Hurricane Plan

As Florida natives & owners of Full Circle Retreats, Kim & Christina know how to prepare for storms. Our main goal is your safety. We will take each storm seriously and prepare for the worst. Our location is 30 miles from the Gulf of Mexico & our elevation is 35 feet above sea level.

- **First Aid Kit** - alcohol swabs, tweezers, scissors, an assortment of adhesive bandages, antibiotic ointment & spray, burn cream, hydrocortisone, adhesive cloth tape, aspirin, ibuprofen, & sterile gauze pads and dressings.
- **6 Windowless Zones** - The main house has four large walk-in closets and two inside bathrooms without windows. These would be utilized for tornadic activity for short periods of time.
- **2 Gas Generators** - Each of these will power our well-water pump, portable air conditioner, refrigerator, and many small appliances. It also has USB chargers to power phones, lights, fans, & other small devices.
- **Fresh Water** - We are on a well that continuously pumps fresh water from the ground and then is treated by a filtration system. The house also has 4 bathtubs which can be used as holding tanks (300+ gallons) for fresh water during storms. Bottled water will be on hand as well.
- **3 Days of Food** for each person. Propane stove and charcoal grill will be used for cooking. Most storms last between 24-48 hours.
- **Battery and Gas powered chainsaws** to clear debris & downed trees.
- **Starlink Satellite Internet**
- **Multiple rechargeable flashlights and candles** are located throughout the house.
- **2 Four Wheel Drive vehicles** for emergency transport. The nearest hospital is 20 minutes away.
