

CAPABILITY STATEMENT

Qualified Contractor Technicians
for the Mining & Civil Industries

OUR COMPANY

Alpine Mining & Maintenance is a family-owned Queensland business specialising in the supply of highly qualified contractor technicians to the mining and civil industries. We deliver expert Mobile Diesel Mechanic and Field Technician services focused on earthmoving and plant machinery.

Established 2024

Founded by our Managing Director who brings over 12 years of experience from one of the industry's leading OEMs. In our first year we supplied skilled Digger Crew labour to operations in the Moranbah Coal Fields. By 2025 we were delivering expert Maintenance Supervisor services on a \$32 million mid-life rebuild project involving Hitachi EH5000AC-3 haul trucks for a major client in the Bowen Basin.

What We Do

We supply qualified Field Technicians, Diesel Fitters and Maintenance Supervisors who specialise in the repairs, servicing and maintenance of heavy earthmoving equipment used across open-cut mining and civil construction sites throughout Queensland. Our people arrive ready to work — ticketed, experienced and aligned with site safety and quality standards.

OUR MISSION

To provide expert Field Technicians for the repairs and servicing of all earthmoving equipment. We are committed to delivering timely mining maintenance services and high-quality machinery repairs, ensuring customer satisfaction. By building strong client relationships and fostering continuous innovation, we strive to help our customers achieve their goals with confidence and efficiency.

OUR VALUES

SAFETY

The safety of our employees, customers, partners and community members is core to everything we do. By prioritising safety, we minimise risk and ensure smooth, incident-free operations on every site.

PREMIUM QUALITY

Our rigorous recruitment process ensures we onboard only top-tier talent — skilled Diesel Fitters and Field Technicians with proven mining experience. Personnel are highly experienced and continuously trained.

INTEGRITY

We operate with honesty, transparency and accountability. We stand by our commitments and build lasting partnerships based on trust and reliable delivery.

ROUTINE MACHINE SERVICING

Our fully equipped Mobile Diesel Fitters provide professional routine servicing and maintenance for all types of heavy machinery, bringing expert care directly to your job site. Whether you operate excavators, bulldozers, loaders, dump trucks, or other diesel-powered equipment, we deliver comprehensive preventative maintenance schedules. With years of hands-on experience and the latest diagnostic tools, we keep your machines running at peak performance, minimise costly downtime, and extend equipment lifespan — all without you having to transport your machinery to a workshop.

At Alpine Mining and Maintenance, we understand that reliable machinery is essential to keeping your operations productive and on schedule. Our mobile service is designed to make maintenance as convenient and efficient as possible, allowing our experienced technicians to inspect, service and diagnose your equipment on site. From routine oil and filter changes and inspections through to identifying potential mechanical issues before they become major problems, we take a proactive approach to equipment maintenance. By keeping your machinery properly maintained and addressing issues early, we help reduce unexpected breakdowns, improve reliability and keep your operation moving.

As part of our commitment to providing a thorough and transparent service, we also provide a free service report following each completed service. This report provides a clear overview of the work carried out, servicing completed and any additional defects or potential issues identified during our inspection. This gives you a detailed record of your equipment's condition and allows you to make informed decisions about any recommended repairs or future maintenance requirements.

- ▶ Preventative Maintenance — Scheduled servicing aligned with OEM recommendations and site production requirements
- ▶ On-Site Capability — Mobile teams arrive fully equipped; no need to move machines to workshop facilities
- ▶ Diagnostic Tools — Latest diagnostic equipment and OEM procedures to identify issues early and accurately
- ▶ Downtime Reduction — Structured service plans that keep fleets productive and reduce unplanned failures
- ▶ Asset Life Extension — Consistent, quality servicing that protects capital investment and maximises machine hours
- ▶ Free Comprehensive Service Report — Detailed record of work carried out and overview of your machines condition

FIELD SERVICE ROSTER SUPPORT

By supplying experienced mobile diesel mechanics and maintenance personnel on a flexible roster basis, we help our customers maintain high equipment availability while reducing the administrative burden of staffing. Whether you need short-term roster coverage, ongoing field support, or additional capacity during high demand periods, our team works as an extension of yours—focused on safety, uptime, and keeping your assets running efficiently.

Our flexible workforce solutions can be tailored to suit the specific requirements of your operation, providing the right level of support when and where you need it. Our experienced personnel are equipped to work across a range of heavy machinery and site environments, integrating seamlessly with your existing maintenance teams and procedures. By providing dependable, skilled personnel without the long-term commitment of additional permanent staff, Alpine Mining and Maintenance gives you the flexibility to respond to changing workloads, planned maintenance requirements, shutdowns and unexpected increases in demand while maintaining a strong focus on safety, reliability and productivity.

- ▶ Short & Long-Term Placements — Flexible engagement models to cover leave, peak demand or ongoing roster positions
- ▶ Site-Ready Technicians — Ticketed, inducted and aligned with site safety and quality standards from day one
- ▶ Mining Fleet Experience — Hands-on background experience with excavators, haul trucks, dozers, loaders and drills
- ▶ Roster Continuity — Reliable supply of personnel so production and maintenance plans stay on track
- ▶ Seamless Integration — Technicians who work effectively within existing site structures and reporting lines

ON-CALL BREAKDOWN ASSISTANCE

Our breakdown assistance service provides rapid, expert response to unexpected machinery failures across mining and civil operations. With our on-site maintenance services, our experienced technicians deliver swift repairs and troubleshooting, ensuring your fleet maintenance management is optimised and your fleet returns to peak performance safely and efficiently. Additionally, we offer reliable shutdown support to minimise downtime.

When equipment breaks down, we understand that every minute of downtime can impact productivity, project schedules and operating costs. Our experienced mobile technicians work efficiently to diagnose faults, identify the cause of the failure and carry out the necessary repairs wherever possible, helping get your equipment back into operation as quickly and safely as possible. We take a practical, solutions-focused approach to breakdowns, with a strong emphasis on safety, quality workmanship and minimising disruption to your operations. Whether you require assistance with a single machine, multiple pieces of equipment or additional support during a planned shutdown, Alpine Mining and Maintenance provides dependable field support when you need it most.

- ▶ Rapid Mobilisation — Quick response capability to get technicians on site and working as soon as possible
- ▶ Accurate Diagnosis — Experienced fitters who identify root causes efficiently and avoid repeat failures
- ▶ Full Tooling & Support — Technicians arrive equipped to complete repairs without unnecessary delays
- ▶ Production Focus — Every intervention prioritises safe return of equipment to productive service
- ▶ 24/7 Mindset — Responsive support when breakdowns cannot wait for the next planned window

SHUTDOWN SUPPORT

We offer comprehensive shutdown support for mining and civil operations, providing skilled teams for on-site maintenance services that ensure safe and efficient execution of major planned maintenance, component replacements, rebuilds, and inspections during scheduled outages. Our expert services also encompass breakdown assistance and effective fleet maintenance management.

Our shutdown teams work closely with site management and existing maintenance crews to ensure work is completed efficiently, safely and to a high standard. We understand the importance of careful planning and coordination during shutdown periods, where multiple tasks often need to be completed within strict timeframes. From scheduled servicing and inspections through to major component change-outs, repairs and preventative maintenance, our experienced personnel provide the practical skills and support required to keep shutdowns on track and minimise equipment downtime.

At Alpine Mining and Maintenance, our focus is on delivering reliable workmanship while maintaining a strong commitment to site safety, quality and productivity. We can provide additional personnel and technical support to complement your existing workforce, helping you manage increased workloads and meet critical shutdown deadlines. Our flexible approach allows us to tailor our support to the specific requirements of your operation, whether you require assistance for a short-term outage or ongoing shutdown support.

- ▶ Component change-outs & rebuilds
- ▶ Engine & hydraulic module swaps
- ▶ Undercarriage & track framework
- ▶ Pre-shutdown planning support
- ▶ Structural inspections & repairs
- ▶ Multi-trade coordination

MAINTENANCE SUPERVISION

Alpine Mining & Maintenance offers highly experienced Maintenance Supervisors who excel in leading and overseeing all aspects of heavy machinery maintenance programs in mining and civil operations. They ensure compliance with OEM standards, site safety protocols, and best-practice procedures for equipment. In addition to providing on-site maintenance services, our team is equipped to deliver breakdown assistance and effective fleet maintenance management. All Supervisors come qualified with RIIRIS301E, RIIWHS301E, RIICOM301E & RIIRIS402E (formerly S1,2,3 & G2), and are prepared to offer shutdown support when needed.

Our Maintenance Supervisors provide strong leadership and coordination across maintenance teams, ensuring work is planned, prioritised and completed efficiently while maintaining a high standard of safety and quality. They work closely with site management, maintenance personnel and operators to identify equipment requirements, monitor scheduled servicing and preventative maintenance, and address potential issues before they lead to costly breakdowns. With practical field experience and a strong understanding of heavy equipment, our Supervisors help ensure maintenance activities remain organised, compliant and aligned with operational requirements, ultimately supporting improved equipment reliability, productivity and uptime.

- ▶ Field proven and experienced leaders
- ▶ OEM-trained on major mining fleets
- ▶ Strong safety culture leadership
- ▶ Quality & ITP compliance focus
- ▶ S1,2,3 & G2 Qualified

FLEET MAINTENANCE MANAGEMENT

Do you have a fleet of machinery that requires regular maintenance and servicing? Alpine Mining & Maintenance specialises in fleet maintenance management for mining and civil machinery, offering comprehensive oversight of your heavy equipment fleet, including haul trucks, excavators, and support vehicles. Our services also include on-site maintenance services and reliable breakdown assistance, ensuring you have the shutdown support necessary to keep your operations running smoothly.

Our fleet maintenance management approach is focused on maximising equipment availability, reducing unexpected breakdowns and helping you stay ahead of scheduled maintenance requirements. We work closely with your team to monitor servicing intervals, identify recurring mechanical issues and plan preventative maintenance around your operational requirements. By taking a proactive approach to fleet management, we help ensure your machinery is maintained to a high standard and that potential defects are identified early, reducing the risk of costly repairs and unplanned downtime. Our experienced team can work alongside your existing personnel or provide additional maintenance support as required, giving you a flexible and reliable solution for managing your fleet.

- ▶ Maintenance Planning — Full maintenance scheduling and planning
- ▶ Machine Monitoring — Tracked and monitored machine scheduled machine hours
- ▶ Resource Coordination — Supply and management of the right technicians at the right time
- ▶ Performance Tracking — Visibility of work progress, downtime and key maintenance metrics
- ▶ Continuous Improvement — Feedback loops that reduce repeat failures and improve fleet reliability

EQUIPMENT EXPERIENCE

Our technicians bring extensive hands-on experience across the major mining equipment fleets operating in Queensland and beyond.

Excavators –

- ▶ Hitachi EX8000, EX5600, EX3600, EX2600, EX1200, Liebherr R9800, R9600, R9350
CAT 6060, 6040, 6030

Haul Trucks –

- ▶ Hitachi EH5000AC3, EH4000AC3, EH3500AC3
CAT 797, 795, 794, 793, 789, 777
Komatsu 930E, 830E, 730E

- ▶ Ancillary plant - CAT dozers & graders

- ▶ Draglines & Shovels

- ▶ Sandvik & Atlas Copco drills

- ▶ Coal Handling Preparation Plants

- ▶ Civil construction machinery – Hitachi, CAT, Komatsu, Bobcat, Kubota, Doosan, Hyundai

PROJECT HIGHLIGHTS

Moranbah Coal Fields — Digger Crew Supply

Supplied skilled digger crew labour to support open-cut coal operations in the Moranbah region. Technicians integrated quickly with site teams and delivered consistent, safe performance across the roster.

Bowen Basin — Hitachi EH5000AC-3 Mid-Life Rebuild

\$32 million mid-life rebuild. Alpine provided Maintenance Supervisor services supporting the major overhaul of Hitachi EH5000AC-3 haul trucks on a complex, high-value OEM rebuild program.

QLD Western Downs — New Excavator Build

Completed a new excavator build project in the Queensland Western Downs. Supplied qualified technicians to support assembly and commissioning works to the required quality and schedule standards.

Central Highlands — Crew Labour Supply

Supplied crew labour to support mining and civil operations in the Central Highlands region. Technicians provided reliable field support and integrated effectively with site teams.

WHY ALPINE?

01

OEM Background

Leadership with 12+ years at a leading OEM — deep product knowledge and industry relationships.

02

Queensland Based

Based in Brisbane and servicing mining & civil operations across Queensland with local knowledge.

03

Ready to Work Technicians

Ticketed, experienced technicians who arrive site ready and are aligned with safety & quality standards.

04

Flexible Supply

Short-term and long-term — we scale to match your operational needs.

05

Proven Delivery

Successful placements on major projects including rebuilds, digger crews and new machine builds.

06

Customer Focused

We prioritise clear communication, reliability and long-term partnerships with every client.
