

ALL PURPOSE BREWERY WASH

This product is a readily soluble free-flowing powdered cleaner and sanitizer, specially formulated for cleaning beer lines. It is a non-foaming high-alkaline caustic-free cleaner containing 4.5% active oxygen that effectively removes protein and fat soils in piping, tanks, filters, fermenters and kettles without the hazardous effects associated with chlorinated and caustic cleaners. The active oxygen helps to sanitize lines in addition to cleaning.

This product may be used with hard or soft water and is effective at all temperatures. The non-foaming surfactants reduce surface tension, resulting in better penetration and rinsing. It is readily biodegradable and phosphate-free.

This product is safe to use with stainless steel, aluminium, brass and copper.

DIRECTIONS:

Dilute as outlined below. Best results are obtained with hot water.

Cleaning in place (CIP)	1-3 oz/Gal	7-20 g/L
Carbonized soot	5-6 oz/Gal	35-40 g/L
Hard surface cleaning	5-6 oz/Gal	35-40 g/L
Kettles	1-2 oz/Gal	7-14 g/L
Kegs, fermenters, parts and equipment	1 oz/Gal	7 g/L
