

CVE - COOCVE Group Purchase Program

MAILBOX SPECIALISTS

Step 1. Find out if the mailbox can be **repaired**; get an estimate: call Guy Paul at “GuyPaul’s Welding.” This is useful for individual box repairs.

or

Step 2. Contact Thomas Lopez at mailboxes.com for **cluster replacement** quote, if Guy can’t repair them or it’s cheaper to replace them. See samples and pricing on their website. You will need to send photos and other info to match the legacy mailbox.

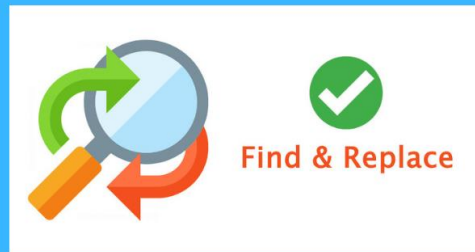

P.S. Contact Guy Paul for help with the installation. Some clusters may require a spacer as size might be slightly off. Remember these are 50 year old boxes.

Note that in both scenarios above, USPS will need to be called to open the main lock on the cluster and close and lock it after repair or replacement.
