Solid Company • Great Management & Culture • Relocation Available

Take Your Career to the Next Level. Make a Difference.

We are retained on behalf of a Texas manufacturing operation to fill this position. Confidential client details are shared with qualified candidates during the interview process.

Quality Engineer

FULL-TIME | EXEMPT | QUALITY DEPT.

Implement and analyze quality policies and procedures to ensure improvement efforts meet or exceed internal and external customer expectations.

WHAT YOU'LL DO

- Lead internal and external process/product quality audits
- Identify and implement statistical metrics and methods
- Develop standard operating procedures, work instructions, and inspection checklists
- Maintain quality system compliance with ISO 9001 and ISO 14001 standards
- Analyze data to identify trends and improve system-wide compliance and efficiency
- Train personnel on quality principles and tools; lead problem-solving teams
- Participate in new product development and supplier development activities

WHAT YOU BRING

- B.S. in engineering or a science field highly desired
- Minimum 2 years of experience in a product quality/manufacturing environment
- Metrology experience (calipers, micrometers, CMM)
- Knowledge of ISO 9000 compliance required; ISO 14001 experience preferred
- Strong organizational, communication, and problem-solving skills; blueprint reading a plus
