X-treme Box® Accessories:

Extension Cords			
PART NO	DESCRIPTION	STD. PK	PKG. WT.
01918	50 ft 6/3 & 8/1 Type SEOW, 125/250 volt, 50 amp	1	27
02918	50 ft 6/3 & 8/1 Type STW 125/250 volt, 50 amp	1	29
01919	100 ft. 6/3 & 8/1 Type SEOW, 125/250 volt, 50 amp	1	54
02919	100 ft. 6/3 & 8/1 Type STW, 125/250 volt, 50 amp	1	57

Our rugged temporary power cords are designed for use with temporary power distribution centers with input current of 50 amp, 125/250 volt A.C., 3-pole, 4-wire.

*For spare parts contact your Coleman Cable representative.

Replacement Ends/Adapter			
PART NO	DESCRIPTION	STD. PK	PKG. WT.
05974	Female, 3-pole, 4-wire, 50 amp 125/250 volt grounding	4	2
05975	Male, 3-pole, 4-wire, 50 amp 125/250 volt grounding	4	2
01920	50 amp "Y" adapter 6/4 SEOW Black	1	4

Replacement ends are constructed with an impact and chemical resistant nylon. The male connector is a stainless steel plug shroud with a rigid vinyl protective shell; a neoprene cord gasket on plug and connectors seals out moisture and dust. The female receptacle contains a heavy-duty brass grounding strap to provide a low resistance ground path and resistance to corrosion.

Coleman Cable has taken x-treme measures to engineer a portable distribution box that is safe and reliable under average to x-treme job site conditions.

Coleman Cable's new X-Treme Box™ is:

X-tremely safe. It utilizes the most advanced GFCI technology to provide you with a rugged, practical and economical power distribution center that virtually eliminates the possibility of electrical shock. The X-treme Box offers GFCI open neutral, and over-voltage protection.

X-tremely portable. It weighs only 34 lbs, allowing you to easily position the power source conveniently close to the work area.

X-tremely flexible. It offers 7 overload protected receptacles, 6 with GFCI protection. Three model choices offer just the features you need to suit your particular application.

X-tremely rugged. The heavy-gauge carbon steel case with a corrosion resistant finish stands up to the toughest abuse without damage. All models have weather-resistant receptacle and circuit breaker covers that keep dirt and moisture out.*

X-tremely expandable. Several boxes can be run in series before a significant drop in voltage occurs. A series of four boxes at 400 feet is not uncommon.

X-tremely economical. It effectively eliminates the labor costs by reducing electrical hook up on jobsite and eliminates the need for separate GFCI's.

*model 1950 has no cover on 50 amp inlet & outlet

X-TREMELY SAFE! X-TREMELY FLEXIBLE! X-TREMELY TOUGH!

EASY ACCESS

Covers lift fully open for easy insertion of cords

WEATHERPROOF

Weatherproof receptacle and circuit breaker covers

TOUGH

Heavy-gauge carbon steel case

1 One NEMA L6-30R 30A 250V locking receptacle with overload protection (NOT-GFCI PROTECTED)

ALL

All outlets circuit breaker protected

REINFORCED

Reinforced sled base with cross bar

COVERED 50 AMP OUTLET

INLET COVERED 50 AMP

MODEL NUMBER 1960

X-treme Box is a safe and reliable power distribution system suitable for a wide variety of applications:

CONSTRUCTION

- Commercial Construction
- Residential Construction
- Remodeling/Renovating
- Demolition

INSTITUTIONAL

- Convention Center
- Special Events
- Sports
- Graduations

ENTERTAINMENT

- Movie/Video
- Stage
- Broadcasting
- Concerts

OUTDOOR EVENTS

- Carnivals/Festivals
- Sports

20AMP/120VOLT NEMA 5-20 OUTLETS LOCKING

STRAIGHT BLADE 20AMP/120VOLT NEMA L5-20 OUTLETS

MODEL NUMBER 1960

Model 1960 Features

- 6 - 20 Amp/120Volt locking, NEMA L5-20 outlets
- 1 - 30 Amp/250 Volt, locking outlet
- 120 Volt outlets GFCI, open neutral & over-voltage protected
- All outlets (not 50 Amp pass-through) are circuit breaker protected
- 50 Amp 125/250 Volt inlet & outlet-covered
- ETL Listed

Model 1950 Features

- 6 - 20 Amp/120 Volt, locking outlets
- 1 - 30 Amp/250 Volt, locking outlet
- 120 Volt outlets GFCI, open neutral & over-voltage protected
- All outlets (not 50 Amp pass-through) are circuit breaker protected
- 50 Amp 125/250 Volt inlet & outlet
- City of Los Angeles Approved
- ETL Listed

MODEL NUMBER 1950

Model 1970 Features

- 6 - 20 Amp/120 Volt Straight Blade, NEMA 5 - 20 outlets
- 1 - 30 Amp/ 250 Volt, locking outlet
- 120 Volt outlets GFCI, open neutral & over-voltage protected
- All outlets (not 50 Amp pass-through) are circuit breaker protected
- 50 Amp, 125/250 Volt, inlet & outlet-covered
- ETL Listed
