

TRANS DECO WALL FILLER
Water-based Filler Coating

Product Description	Water based filler sealer.	
Recommended Use	Suitable for interior used where physical irregularities occur in brick, concrete or cement tender.	
Physical Data	Colour	White
	Coverage	Approximately 6 - 8 sq.m/ltr, depending upon the texture and porosity of the surface
	Packaging	5 kgs ; 25 kgs
Surface Preparation	Remove all loose material and if necessary block down wall.	
Application Data	Application Method	Stir thoroughly with a flat stirrer before and during use. Applied by blade or knife.
	Drying Time	
	Touch Dry	30 minutes at 25°C ; 50% relative humidity
	Recoat	Minimum 2 hours at 25°C ; 50% relative humidity
	Note: Lower temperatures and/or higher humidities will extend drying time.	
	Clean Up	Equipment should be cleaned with water. Clean all equipment with water immediately after use.
	Thinning	Usually no thinning required, but if necessary thin up to 5% with water.
Precaution	Do not use at temperature below 10°C or when humidity is very high. Avoid painting in temperatures greater than 30°C as a very hot surface will make application difficult. Do not apply to surfaces previously painted with wax-containing finishes. Provide adequate ventilation during use. If swallowed seek medical advice.
