MATEO INDUSTRIES

About Us

We are Mateo Industries, a technology company based in Pittsburgh, PA, known as the best Drone Show storytellers in the space. We push the boundaries of artistic creative performances, bringing creative concepts and technology together. We are a best-in-class team that understands what superior brands expect in production value.

Safety - What Sets Us Apart?

Our Drone Show system utilizes a suite of programming environments to generate smooth and collision-free trajectories, simulating flight data and creative lighting programming.

What sets us apart is our commitment to safety and security, achieved through the use of advanced dual-band frequency technology. This approach minimizes interference and ensures uninterrupted operation during live events. In addition, we employ redundancy options in our drone systems, ensuring that even in the unlikely event of a technical issue, the show goes on seamlessly without compromising safety.

Key Safety Differentiators

- **Drone Cages:** Our drones are equipped with enclosures that completely surround the drone, protecting the propellers and preventing them from coming into contact with people or objects.
- **Triple-Redundancy Safety System:** Our drones are equipped with multiple backup systems, guaranteeing a safe and controlled performance, even in the event of component failure.
- **Fail-Safe Mode:** In Fail-Safe Mode, if the drone's autopilot system detects a critical failure, the drone's autopilot system takes control of the drone, automatically initiates a controlled descent, and lands the drone straight down safely, minimizing potential damage or risk.

DRONE SHOW BENEFITS

Utilizing our services provides an opportunity for unparalleled brand visibility as drones create stunning and memorable aerial displays that capture the attention of a wide audience, both on-site and through media coverage.

This exposure helps increase brand recognition and recall. Associating with such a high-tech and innovative form of entertainment can enhance a brand's image, portraying it as forward-thinking and creative.

Furthermore, the emotional impact of a well-executed drone light show can leave a lasting positive impression on viewers, fostering brand loyalty and customer engagement.

A new drone show, "Disney Dreams that Soar Presented by AT&T," is coming to the Disney Springs shopping, dining and entertainment complex at the Disney World Resort in Florida this summer.

During the nine-minute show, 800 drones will be choreographed to form images of Disney characters set to familiar scores. The show will also feature an original song.

The nighttime show will run from May 24 to Sept. 2. Showtimes will vary but it will run twice each night.

Disney 'Dreams That Soar' drone show lights up sky with Star Wars, Marvel and more sci-fi favorites

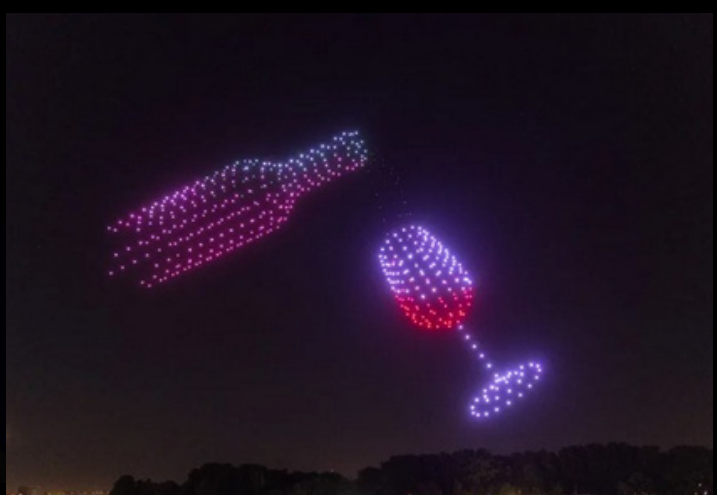

By Matt Cabral July 23, 2024

Walt Disney World and Disneyland have been dazzling guests for decades with their nighttime spectacles. Incorporating everything from elaborate fireworks displays and inspired water projections to stunning pyrotechnics and the half-million-plus LED lights that brought the fan-favorite Main Street Electrical Parade to sparkling life, these evening events have consistently provided a perfect way for patrons to cap off a busy day at the parks.

With its new Dreams That Soar show — performed nightly through Sept. 2 at Orlando's Disney Springs shopping and dining district — the company is continuing this tradition, but ratcheting it up with a fresh technological twist. More specifically, the limited-time evening event is leveraging 800 drones to retell some of Disney's most iconic tales. But as the production's title cleverly suggests, its content is solely focused on flight, including nods to popular franchises and characters that are associated with their ability to take to the skies.

As expected, this approach sees the likes of Peter Pan, Dumbo, and even the helium balloon-propelled house from Pixar's "Up" brought to life by the carefully choreographed, sky-illuminating tech. But the spectacle's specific theme also opens the gates to science fiction films and heroes, from Wall-E and "Big Hero 6"'s Baymax to everyone's favorite space ranger, Buzz Lightyear. Of course, Disney's biggest sci-fi properties — "Star Wars" and "Marvel" — are not only present and accounted for, but serve as two of the nearly 10-minute performance's most significant inclusions.
