## T's Shop Talk

Greetings all,

Since the heat has subsided a wee bit, we are getting busier and busier. The Model A/Model T picnic on October 2<sup>nd</sup> at Spring Mountain Ranch State Park was a huge success. The drive alone (which was 55 miles each way for me) was beautiful. We definitely have to go back to the park in the future. We had Four Model T's and six Model A's for a total of 10 cars that made the event. The Model A club did an outstanding job with games and festivities and the food was wonderful. We even made a little money on the auction! I believe there were 50+ people at the picnic!

Thanks to Ron Custer's diligence with the Cadence Car Show we were able to be included in the fun. We had six cars this year. Scotty and Malinda Ray won best of show with their 1914 Model T. Thanks again, Ron for doing all the calls to get some cars out there with only 48 hour short notice.

Dave Cuddie came over to start helping me with the 1926 Coupe. We have the tires off and we are working on putting the wire rims back on the 26 Coupe. There is definitely more to this than you would think!

Hope everyone is well and can make some future events and have some fun with us. Be sure to mark your calendars for the December 10<sup>th</sup> Christmas party at Dean's Place.

Safe travels,  
President Tom

## The Accessory Corner

Each month I'll provide an interesting accessory supplied by one of the many companies capitalizing on the Ford name and found on virtually every Model T that I've ever come across.

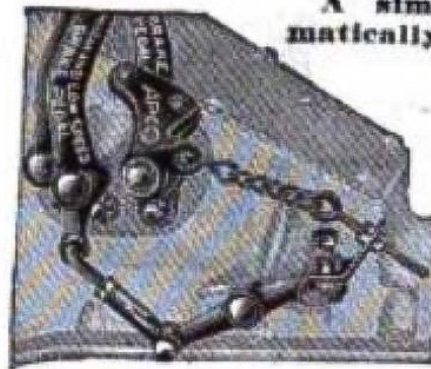

This month's accessory I found in a box of T parts at a swap meet last April. It's a pretty cool accessory that doesn't require the use of the hand brake lever when applying the brake pedal. This accessory, made by APCO automatically releases the clutch every time the brake pedal is applied. Would be great in stop and go traffic! Pretty clever device!

The ad is from the 1915 APCO Ford Specialties catalog I found online that describes the device and shows how it was installed.

By: Wallace Bellows

Accessory Corner pictures continue next page.

### CLUTCH RELEASE. PRICE 50c.

A simple device that automatically releases the clutch on the model "T" Ford when the foot brake is applied. Pressure on the brake pedal releases the clutch before the brake is applied, and if you wish to coast, you simply push the brake pedal forward, which releases the clutch, and pushing the brake pedal further forward applies the brake and brings the car to a standstill without the use of the emergency brake or the clutch pedal. This device will be found a great help to amateurs, as with it, it is impossible to apply the brake without first throwing out the clutch. In reversing, the foot is always on the brake pedal to stop the car instantly without stalling the engine. Applying the brake without first throwing out the clutch wears the brake out quickly and puts a strain on the clutch that will cause it to slip after a few weeks' use. Our first release was rather hard to install, but by using a chain construction we have eliminated this trouble and anyone can make the installation in ten minutes with a screw driver and a wrench. Furnished complete ready to install.

## A Note from the Editor

I'd like to take a moment and thank the Board for voting me into the position of Newsletter Editor. I appreciate the opportunity to put this together. It's been a learning experience for sure as I haven't owned or used a computer in over a decade. That being said, I appreciate the grace you all will show if I should stumble from time to time, as I learn the programs all over again. Thank you for your patience!

We would like to encourage everyone to please send their articles and pictures to us for inclusion in newsletters. Submissions need to be sent to the newsletter editor **no later than 12pm on the 10<sup>th</sup> of each month.**

Submissions will be placed into the newsletter so that time sensitive items will always be prioritized first. Other member articles, pictures et cetera, will be placed into the newsletter as space allows.

**All written submissions must be in complete paragraph form.** The editor will not be writing any articles on behalf of a member so be creative and have fun! Paint us a picture with your words and tell us your story!

All submissions to the editor will be checked for basic grammar and punctuation and minor editing changes may be made. If the editor has a question, you will be contacted.

All submissions to the editor will become the property of the SNMTC and by submitting to us you are consenting to have your article printed in the newsletter.

Barbara Bean, a member of a Model T Club in California invited me out for an event in San Jose. She mentioned a Model T "put together" and the club managed to save a few things for me to bolt on the car so I could participate in the build.

It was very fun, went smoothly and we got the whole thing put together in about 16 minutes. (Barb and I helped to speed it up a little as we were the youngest by far!)

## Come on in the Water's Fine

**A FIVE-MINUTE** trip through the Automobile Wash Bowl removes all dust, dirt and mud from the wheels, spokes, fenders and running board. The churning action of the water in the Bowl is a natural cleansing action. The whirling motion produces a gentle spray that loosens the grime and dirt without injury to the paint. Every car owner enjoys his drive through the Bowl.

The Automobile Wash Bowl at St. Paul, Minnesota, built by the originators of this modern method for cleaning cars, has attracted the attention of business men and women throughout the United States. Business magazines have featured it the sensation of the year.

The motoring public has acknowledged its practical advantages—its decided improvement over the old method. They demand more Bowls because a car wash by this method is 50% to 75% more economical! In St. Paul, for

instance, one bowl has proved inadequate. As high as three hundred cars have been put through the Bowl in one day, and then we were forced to turn many away.

Effective immediately, we will establish these Bowls in every State and City in the Union. The City of Chicago—a virgin field—offers unlimited possibilities to men and women who are in position to finance the building of these Bowls. The rights to build these Bowls, covered by broad patents, are sold outright to the owner. Only a very nominal overhead is required to operate the Bowl.

Further particulars will be gladly furnished to interested parties. Investigate NOW!

Note: Our representatives, Mr. C. S. Miles and Mr. V. G. Larsen, will be at the LaSalle Hotel, Sunday, July 23rd, Monday, July 24th, Tuesday, July 25th. Phone them for appointment.

*Salesmen capable of closing contracts for the privilege to build these Bowls are requested to write us promptly*

## The Auto Wash Bowl in Chicago, ca. 1920s

Here's a photo from 1924 and shows a newfangled type of car wash that stood at the northwest corner of 42nd Street and South Michigan Avenue.

C.P. Bohland's patent

There was at least one other auto wash bowl in Chicago—the concept actually originated in St. Paul, Minn. It was patented in 1921 by inventor C.P. Bohland, who opened two locations in St. Paul. He devised the bowl as an easy way to clean mud off of the underside of cars. Back in this early age of motoring, roads were often unpaved and muddy, and that mud would get caked on the underside of the car and the wheels—but a spin in the nifty Auto Wash Bowl took care of that.

NOVEMBER 2022

The nearly 80-foot-wide, ridged concrete bowl was about 16 inches at its deepest point in the center. Customers paid 25 cents to an attendant who strapped a protective rubber cover over the radiator. Patrons would then enter the bowl via a ramp and drive their cars around and around the bowl at a speed of about 10 miles per hour. The ridges in the concrete would vibrate the car and the water, creating a sloshing action that helped wash away all the mud from the chassis and wheels.

The process took about three or four minutes. The car would then exit the bowl where patrons who wanted a complete car wash could enter one of the bays where the rest of the car would be cleaned. On a busy Saturday, about 75 cars per hour would go for a spin in the wash bowl.

NOVEMBER 2022

Once the idea had proved successful in St. Paul, the patent holder began advertising in other cities to franchise the operation. The first Auto Wash Bowl in Chicago was built by a Chicagoan named C.G. Burkhartsmeier on the southeast corner of Diversey and Elston on the city's North Side. Burkhartsmeier bought the rights in 1924 and built his bowl and service station at a cost of \$20,000.

A fun note: The architect on the job, William C. Presto, was a former employee of Louis Sullivan's who later gained fame for giving the destitute Sullivan his last commission, designing the façade of the Krause Music Store in Lincoln Square and the lavishly decorated Art Deco building at 6424 N. Western.

## ***“T” TIME WITH OUR FRIENDS & OUR AWESOME ADVENTURES TOGETHER***

---

We have had some INCREDIBLE outings for the month of October! We’ve been to Bro’s, Vickie’s & Skyline for breakfast. SNMTC member Jim Marsh surprised us and popped in for a quick visit! Thank you, Mr. Marsh! As you remember, on September 24<sup>th</sup> we participated in “Caffeine and Chrome” at Gateway Auto as a featured car club and followed that up with a luncheon at Sierra Gold. I have more pictures than I know what to do with, so now I’ll share as many as I can with all of you! The Model A/Model T picnic out at Redrock was exceptional. Food, great games, camaraderie, and an auction. The Model T club had the best score after the games and brought home the trophy. The Model A team wants to try and win it back next year! Little do they know; we intend to keep it! Then, off to the Cadence car show where Scotty and Malinda received an award for their 1914 Model T that he affectionately calls “Marvin”. After that we went to the Heritage Street Museum on an absolutely glorious day! We had a handful of cars and visitors as we parked directly on Heritage street. Ron & Karen brought her mom and she decided to climb a tree! Karen told her mom that she wouldn’t stop her from climbing it, but she would take her to ER if she had fallen! October has brought such fun!
