Device Configuration for Internal Alert Management

Disclaimer - Internal Management - Requirements:

The individuals selected by the company to receive SOS calls must be available to answer at all times. If the chosen respondents do not respond, Laxson Solutions cannot be held responsible. **I have read these conditions:** initials _____

All the units will have the same designated contacts for alerts. If each unit has different responders, please use 1 document per unit

Check the supervisions you wish to receive:

Alerts to supervise: SOS Alerts Fall Alerts Low battery alert Low Battery Email : _____

1) ACTION FOR SOS CALL & ALERT

Note for Internal Alert Management: Only individuals who are available to receive calls 24/7 should be added. If this is not possible, we recommend using the call center option instead.

SOS Call and Alerts for Designated Contacts: Please provide cell phone numbers for calls, as well as mobile and email addresses for alerts.

#1) Name: _____ Tel: _____ Email: _____

#2) Name: _____ Tel: _____ Email: _____

#3) Name: _____ Tel: _____ Email: _____

#4) Name: _____ Tel: _____ Email: _____

2) ACTION FOR FALL ALERTS:

Same contacts as above or complete below

#1) Name: _____ Tel: _____ Email: _____

#2) Name: _____ Tel: _____ Email: _____

#3) Name: _____ Tel: _____ Email: _____

#4) Name: _____ Tel: _____ Email: _____

Note that the voice call function of the WSAP SOS call, works based on the availability of the cellular network according to the location of the unit at the time of the alert.

Important Note: The fall detection function does not guarantee detection of 100% of falls. If a fall occurs and the device does not detect it, the user must press the SOS button to request assistance.

Please complete and save this document for your records. Once finished, kindly email us at info@laxsonsolutions.com so we can configure your devices. Thank you!
