- Site supervisors
- Workers on your sites
- Workers with supplied mobile phones

MAIN FEATURES

- Lone worker device mobile version
- Alert and SOS call with Button icon on mobile screen
- Alert and SOS call on external B-DOT button
- Fall detection
- Location and tracking history
- Scheduled function
- In/out of zones alert
- Manage alert settings remotely with ConexGo web portal

Our worker APP support solution

WSAP is a lone worker application (LWA) that turns your smartphone into a worker alert device. Using the app provides many alerts, such as SOS, fall detection, entering/exiting zones, low battery, etc. In the event of an emergency, the user will be connected to your dedicated responders based on the unit's alert contact configuration, via the ConexGo™ web management portal.

Web portal management

- 24/7 Web & mobile Visibility
- Web & mobile Alerts
- Event reporting
- Many configurable alerts
- Simple interface
