

### G-007 configuration information

Since these devices can be used in so many types of applications, to prepare your account and prepare the unique configuration setting of the devices based on the usage case, please provide the required information. Since these devices are battery operated and tracking frequency and duration of battery life are linked.

Most of the settings will be created in advance based on the application to get the longest duration of usage and as well you will receive your device ready to go in your portal with no configurations to do. Once the overview training is completed, as admin user you will have access to turn on or off notification or to create or delete zone etc.

**1) The GPS device will be installed on a: (Please select)**

Trailer      Container      Car      Boat      Equipment      Other
