

WSAP – Worker Safety Alert Mobile App

Mobile lone worker protection

IDEAL FOR:

- Lone workers and isolated employees
- Mobile and field-based staff
- High-risk or after-hours operations
- Supervisors and safety managers
- Organizations deploying BYOD or company-issued smartphones

WSAP is available for Android and iOS devices.

MAIN FEATURES

- On-screen SOS alert and automatic emergency call
- External B-DOT SOS button support
- Automatic fall detection
- Pre-alert countdown with false alert cancellation
- Real-time GPS location for outdoor alerts (on activation or schedule)
- Automatic alerts to supervisors via voice call, SMS, email, and portal pop-ups
- Configurable escalation rules and alert workflows
- Remote configuration via ConexGo web portal
- Centralized alert management and reporting

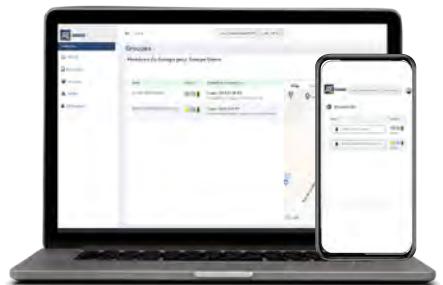

Our worker APP support solution

WSAP is a mobile lone worker protection solution that transforms smartphones into full safety devices.

The app enables workers to trigger SOS alerts, automatically detect falls, and send real-time location data during emergencies. Alerts are routed to designated responders based on predefined escalation rules, all managed through the ConexGo™ web portal.

Web Portal Management (ConexGo)

- ✓ Real-time web and mobile visibility
- ✓ Multi-channel alert notifications (SMS, email, voice)
- ✓ Event history and audit-ready reporting
- ✓ Configurable alert rules and escalation workflows
- ✓ Simple, intuitive interface for supervisors and safety teams
