This online interactive workshop is designed for early childhood educators, teachers, and caregivers who work with children from birth to six years of age. Interested and curious parents will also find this workshop helpful in understanding childhood temperament and development. Gain a deeper understanding of how young children learn, the importance of belonging and social emotional learning, and how to teach these life skills in a classroom or care setting. Participants will earn recognition as Certified Positive Discipline Early Childhood Educators and will learn to:

- Create a classroom or care setting where children can develop a sense of belonging and significance based on the importance of contribution and mutual respect.
- Understand how young children learn and how to adapt teaching to the needs of this age group.
- Foster essential social and emotional skills to support development and school readiness, and understand behavior and how to guide it in groups of young children.
- Teach the essential skills for developmentally appropriate participation in class meetings.
- Learn Positive Discipline and Adlerian concepts for use in the classroom, preschool community, and with parents.

*This was a practice changing experience.. I feel so full and so ready for this year; I find myself hoping I have some of those students in my classes again, to build and repair relationships, and to be the teacher they've needed me to be.*
