# + Disruption | A Conversation about AI & Coaching

- AI demo: “What ensued was a transactional conversation between the bot and coach. It was not coaching!”
- Email exchange with CEO: “I was not only man-scolded for being ‘emotional’ about the topic but told that ‘...most coaches are transactional anyway, so AI may as well support those transactions.”
- “Just because AI can spit out 1,000 poems in 30 seconds, does not make it a poet.”

# + Disruption | AI and Coaching Considerations

---

- The AI Coaches reflect their creator
- AI asks lots of poor questions:
  - “Can you give context?”
  - “Could you tell me...”
  - “Does that sound right?”
  - “Here are some resources”
- “The medium is the message.” Marshall McLuhan  
The medium through which we choose to communicate holds as much, if not more, value than the message itself.

# Disruption | Q & A

# Orientation

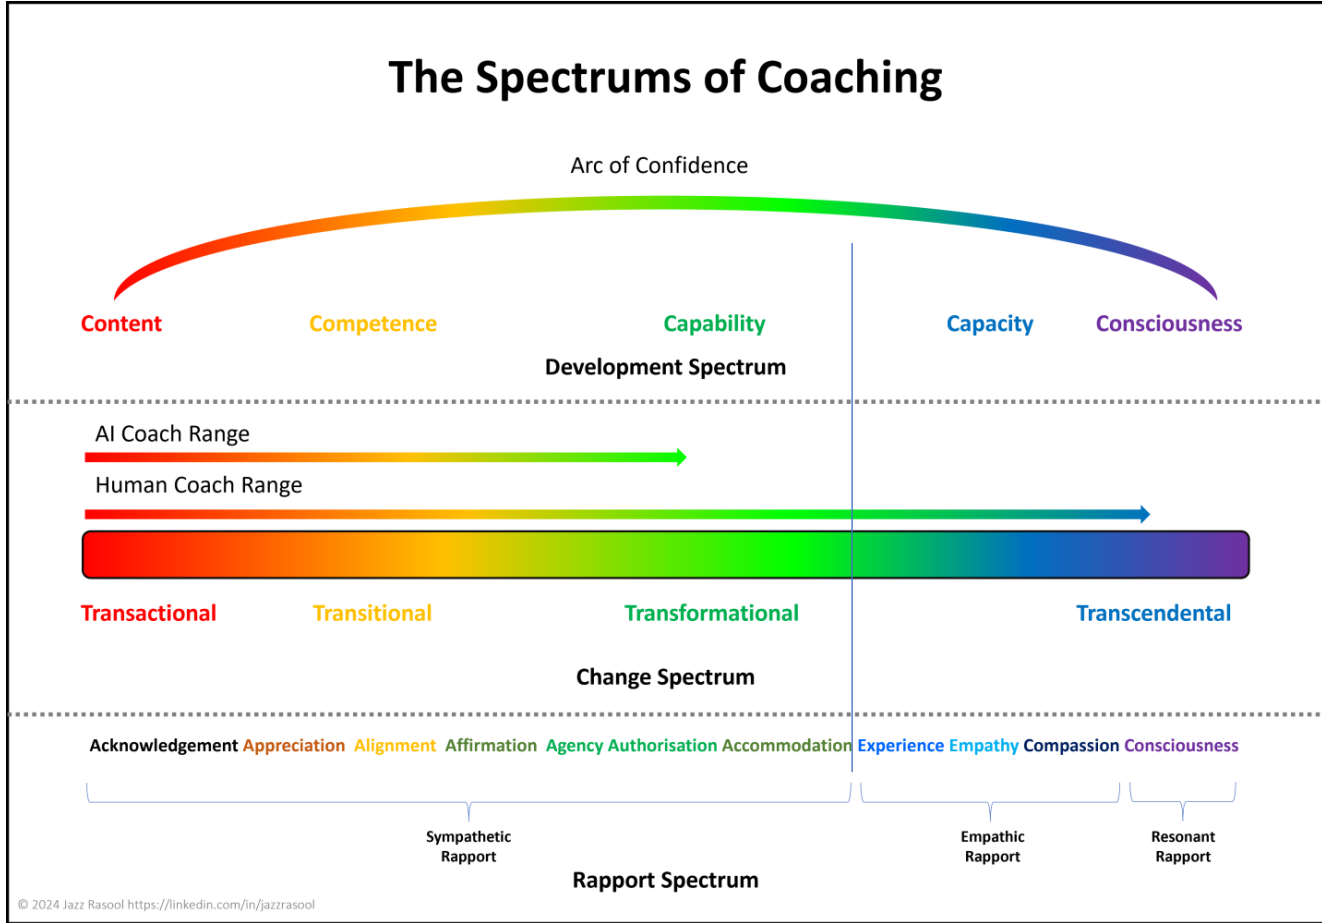

A photograph of a railway track stretching into the distance, surrounded by lush greenery and palm trees under a warm, golden light. The track is the central focus, leading the eye towards the horizon. The surrounding landscape is filled with various plants, including tall grasses and palm trees. In the background, there are hills and a utility pole with power lines. The overall atmosphere is serene and hopeful.

# Orientation | The Future of Coaching

# The Spectrums of Coaching

*This line separates simulation vs emulation*

*The Spectrums of Development, Change and Rapport progressed through in Coaching with increased challenge and goal complexity as well as coach maturity. Jazz Rasool*

A top-down view of a bowl of Vietnamese pho. The bowl is filled with a clear broth, thin slices of beef, and a variety of fresh toppings including bean sprouts, sliced jalapenos, and fresh basil leaves. A pair of wooden chopsticks is visible on the right side of the bowl. The text "Orientation | The Future of Coaching" is overlaid in white on the center of the image.

# What is the Future of Coaching in an AI World?

---

"Artificial Intelligence is just that, an Intelligence, not Wisdom:

Data is not Information,  
Information is not Knowledge,  
Knowledge is not Intelligence,  
Intelligence is not Wisdom,  
Wisdom without Power to apply it is just Data."

Jazz Rasool

# Connection

*The coach's ability to create a **deep bond** with the client through attentive listening and empathy, fostering an environment that nurtures open communication and trust, which in turn catalyzes awareness, insight, and **transformative change**.*

## 1. Coaching Mindset | Elevate Questions

1. Beyond Models, Patterns and Predictability
2. Poor AI Coaching Questions:

Closed questions	to	Open
For information	to	Exploration
Preloaded questions	to	Silence

## 2. Coachability | Be Coached

# Action | What will you now do differently?

- *How did you learn coaching?*

## + Notes to add

“There is a recognition of AI as a competitor, potentially replacing human coaches in some or all of their work.”

### Trends in Digital and AI Coaching 2024

1. Per cent AI will not deliver coaching 3.1
2. AI will only be used to offer AI coaching to those that can't afford human coaches 14.2
3. AI will be used by some coaches to augment their practice 46.1
4. AI will replace some (20–50% of) human coaches 32.8
5. AI will replace most (more than 50% of) human coaches 3.8

## + Quotes

- “I take people into deep waters, and you discover yourself.”
- “When I talk to you, I feel myself calm down.”
- “After 10 sessions, “I am not sure who I am without this job... They may terminate me...” “Who are you?”
- Coachability
- Muddying the waters | The AI’s aren’t coaching

# + Notes to add

- How did you learn coaching (SDG – not the UN Sustainable Development Goals)?
  - See coaching
  - Do coaching
  - Get coaching
- “The medium is the message”
- AI is muddying the waters – just like we coaches are
- Defining an AI coach: We define an "AI coach" as a digital resource that assists learners in practicing real-world skills by providing feedback as they are engaged in them. John Cleave
- Unlike AI tutors, which provide answers to questions and suggest personalized learning pathways, AI coaches focus on self-reflection and metacognition, fostering self-directed learning.
- Research says that AI coaching works well when there are clearly defined goals and explicit measures of success. Dr. Nicky Terblanche
- 7 Facts about our brains – we are networks learning from other networks (not just cognitive experiences)
- As I share a story our hearts get aligned and in rhythm
- AI coaching defined: “machine-assisted, systematic process of helping clients set professional goals and construct solutions to achieve them”. Carolin Graßmann and Carsten C. Schermuly
