

for a much cleaner future, together!

# SPECIALTY CHEMICALS

specially crafted and curated industrial chemicals for effective  
cleaning and microbial reduction

## ABOUT US

**A Bangalore based Chemical Manufacturing Company that curates and crafts the perfect solutions for the Agro-commodity, Food & Beverage, Water, Brewery, Dairy, Veterinary and Healthcare Industries!**

**Our Specialty Chemicals are formulated to emphasize the most essential element of all - Hygiene!**

**Our three decades of expertise in the process and production industries has enlightened us that a truly safer product comes only from ensuring that the hygiene standards are immaculate and contamination is eradicated.**

**We believe that cleaning is not just an activity, but is a scientific process!**

## What is Disease?

*Animal disease, an impairment of the normal state of an animal that interrupts or modifies its vital functions.*

*Diseases of animals remain a concern principally because of the economic, productive, reproductive and mutation losses they cause and the possible transmission of the causative agents to humans.*

*The branch of medicine called veterinary medicine deals with the study, prevention, and treatment of diseases.*

## What is Biosecurity?

*Biosecurity is characterized as an arrangement of practices that forestall or significantly lessen the danger of introducing new infections to a farm or stable.*

*A decent biosecurity program should address the anticipation of disease entry and spread on a farm, stable. Biosecurity is a major mainstay of livestock production, which protects the health and wellbeing of the animals including boosting their immunity and making them fit and healthy. Biosecurity centers on forestalling both the possible entry of infectious agents and their spread within the farm..*

INTRODUCING

Klensce is curated to perfect the art of cleaning  
with the right scientific process to it.

In simpler words, it is the science of cleaning!

IMPROVES ANIMAL  
HEALTH

IMPROVES ANIMAL  
IMMUNITY

IMPROVES EFFICIENCY  
AND PRODUCTIVITY

PROVIDES FOR THE  
ESSENTIAL NUTRIENTS

PROVIDES FOR A SAFE  
ENVIRONMENT AND BIOSECURITY

### ANTI MICROBIAL

V1 - Tetracycline Hydrochloride  
V2 - Cephalaxin  
V3 - Trimethoprim and Sulphadiazine

Our Anti Microbial powders are all crafted with rich and effective ingredients that not only help fight diseases but also provide for a far more effective immune system response.

They are curated to keep the animal resistant to the microbial load and also to improve their overall health.

A fit animal is pheno-minal!

Form - Powder  
Packaging - 100, 250, 500 and 1000 G

### IMMUNITY BOOSTERS

V4 - Glycine Chelated Minerals

Our Immunity Boosters are all crafted with specifically selected pure vitamins and minerals that not only help the animal become fit and healthy but also provide for a far more effective production cycle and makes the animal resistant to diseases.

They are curated to keep the animal stronger, fitter and healthier and also to improve the production efficiency.

A fit animal is pheno-minal!

Form - Powder  
Packaging - 100, 250, 500 and 1000 G

### FEED ADDITIVES

V5 - Protein Pro

Our Feed Additives are made from the purest and safest ingredients to ensure that the animal not only gets the right nutrients but also consumes safe and unadulterated boosters.

They ensure that the animal maintains their nutritional value along with providing for a better body score and overall fitness.

A fit animal is pheno-minal!

Form - Powder  
Packaging - 100, 250, 500 and 1000 G

## WE CARE!

Everything we do is powered by innovation. Our aim is to provide advanced, preventive animal healthcare and develop smart and effective solutions for those who raise and care for animals. Our specially crafted chemicals are tailor made and being used in the following industries -

CATTLE

STABLE

SHEEP

POULTRY
