

OUTBACK CHARGE CONTROLLER CHARGE SETTINGS

The Outback charge controller can be used with MPS batteries

Care should be taken to adjust settings accordingly when having multiple charging sources.

48V-16kWh in unmanaged mode	
Maximum charge current per battery	150A
Recommended charge current per battery	150A
Bulk / Absorption voltage	56.8V
Float voltage	56.8V
Equalize voltage	Disable or change to bulk voltage
Temperature compensation	Disable
Absorption time	1 hour
Re-bulk voltage	52.4
Absorption end current per battery	1
