LEANSETGO FUN, ENGAGING, AND MOTIVATING

Experience how our proven transformational framework can improve your culture and performance.

What is LeanSetGo?

LeanSetGo is a fun and interactive simulation demonstrating how aligned and empowered teams can help a struggling company perform optimally.

Each participant is assigned critical roles in a beverage processing plant. The team has three rounds to demonstrate they can meet customer demands. Otherwise, the plant must close its doors forever.

Learn by Doing

Before each round, participants will learn how the following concepts can shift their company from surviving to thriving. After each round, team members reflect on their performance and apply their knowledge to iterate toward the company's shared vision and goals.

Impact

After attending the simulation, participants will be inspired and motivated to apply what they have learned in the real world.

With continued learning and practice, your organization will significantly improve its performance while growing a culture of empowered and engaged teams who attract long-term loyal customers. This is a win-win for all stakeholders in any organization!
