

LEAN CERTIFICATION

Learn It. Apply It. Demonstrate It.

Level 1 — Intro to Lean

Build a practical foundation in Lean through the LeanSetGo™ simulation workshop and a guided improvement project. Learn core principles, apply them in a hands-on environment, and demonstrate your ability to improve processes. The certification project focuses on reducing Cost of Goods Sold (COGS).

01

Level 2 — Advanced Lean Tools & Principles

Deepen your Lean capability through advanced virtual training, mentoring, and real-world application. Apply advanced tools and principles to a Lean project and demonstrate measurable improvement.

02

Level 3 — Enterprise Lean Leadership

Develop the leadership capabilities to guide Lean transformation across an organization. Work with a Lean mentor to strengthen strategy, coach teams, overcome barriers, and build systems that sustain continuous improvement. Level 3 is available to participants who meet established prerequisites and complete an enterprise-level improvement project.
