Experience Lean in Action

WHAT IS LEANSETGO™?

LeanSetGo™ is an immersive team simulation that challenges participants to improve the performance of a struggling fictional company. Teams apply Lean principles, analyze performance, solve problems, and make decisions that directly affect cost, quality, delivery, and customer value.

APPLY LEAN IN REAL TIME

Before each round, participants learn practical Lean concepts and immediately apply them to the simulation. Teams review results, identify gaps, and adjust their approach—creating a continuous cycle of learning, application, and improvement.

THE IMPACT

Participants build confidence in problem-solving, teamwork, decision-making, and continuous improvement. Organizations benefit from greater engagement, shared learning, and practical skills that can be applied back on the job.
