

UNICLIC

glueless locking for both
sides of the panel

THE INDUSTRY'S FIRST CHOICE

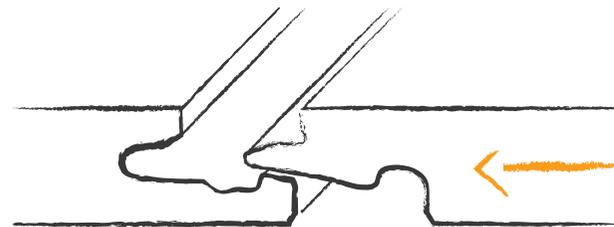

UNICLIC is the **established favorite in the industry thanks to its unmatched efficiency and technical performance**. This glueless locking technology for flooring and wall panels works for both the long and short sides of the panel and is easily installed by angling or snapping.

UNICLIC guarantees a high tolerance control towards height differences and (unwanted) gaps through a flexible lower lip in combination with contacts and spaces in the joint.

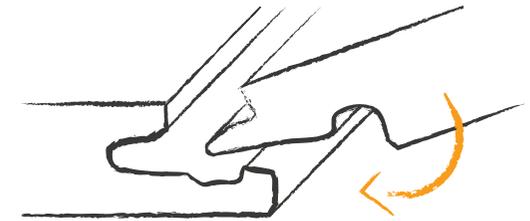

All materials

- Laminate
- Engineered: 3-layer, multilayer, HDF core, bamboo
- Solid: wood, bamboo, strandwoven bamboo
- Resilient: SPC, LVT, WPC
- Others: cork, OSB, Micodur, Cement fiber, MgO...

2 installation methods

SNAP (HORIZONTAL)

ANGLE

Why choose UNICLIC locking?

EASY AND FLEXIBLE PRODUCTION

QUICK, EASY AND CLEAN INSTALLATION

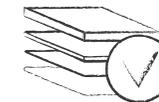

BEST TECHNICAL PERFORMANCE AMONG ALL LOCKING SYSTEMS

NO HEIGHT DIFFERENCES AND A SEAMLESS JOINT

ENSURED LONG-LASTING STABILITY

FITS ALL MATERIALS STARTING FROM 3,2 MM
