

LIFESAVING NEWS FROM MICRO VEHICLE TECHNOLOGYSM

- Imagine, if instead of a rescue swimmer exhausting precious energy to reach a blue water, shoreline, swift water, or flood zone casualty, they could swiftly descend from a helicopter in the recently patented Compact Powered Rescue Apparatus (CPRA), a portable, auto-inflated, E-waterjet powered rescue watercraft: a game-changer in water rescue technology- the lifeline communities need when disaster strikes.
- The CPRA is purpose designed to enable a rescuer/rider to retrieve, immobilize, provide in situ medical attention, and transport a helpless water casualty to safety.
- Don't let rescue operations overwhelm, let CPRA empower! This visionary life saving innovation promises to revolutionize water rescue, offering rapid deployment and unparalleled maneuverability in critical situations.
- With lives on the line, we urgently need your support to transform this concept into reality. Together, let's pioneer the future of water rescue with the CPRA.
