

Tree cutter Blue EG

With EG energy grapple wood gathering is more productive and profitable! Top quality product that allows you to be fast and efficient. Excellent for cutting round wood up to 300mm as well as cutting bushes.

Standard grapple construction. Materials used are well known SSAB quality Weldox 700, Strenx 650 Mc, HARDOX 450. These materials give very high durability and as light weight as possible. Lighter grapple means longer life time for excavator and less energy consumption.

- Grapples have additional fastener points where to attach any, specially adjusted coupling. Adapters should be fastened with screws
- Strong powerful cylinder that ensures safe cut of materials.
- Passive knife (screwed to the grapple) ensures fast work of excavator as there is no need of additional function during the cutting of tree.
- Passive Knife doesn't need any additional hydraulic connections from excavator.
- EG 25 and EG 30 have speed valve.

| | | | EG 18 | EG 18 | EG 18 |
|------------------|---|---------|-----------|-----------|-----------|
| Weight |  | kg | 185 | 250 | 300 |
| Max opening |  | mm | 700 | 680 | 840 |
| Grapple length |  | mm | 670 | 800 | 950 |
| Grapple width |  | mm | 290 | 410 | 540 |
| Working pressure |  | bar | 180 - 250 | 250 - 300 | 250 - 300 |
| Min oil flow |  | l / min | 25 | 60 | 90 |
| Single cut |  | mm | 150 - 180 | 250 | 300 |
