

Material Flow Verification

Checked.

Guaranteed.

Traceable.

Global Source of Trust: REYBOTEX® Verification Check

“We only use GRS
certified factories.”

&

“We check every step
in the supply chain.”

REYBOTEX® is our branded r-PET yarn - a premium recycled material that represents the future of sustainable textiles.

Beyond its inherent quality and performance characteristics, we've engineered a unique internal verification system that tracks the material from its origin through every stage of production to the final product.

This comprehensive approach gives you the documented proof that your products contain exactly materials what we claim - not estimates, not approximations, but verified facts.

The result?

Unshakeable confidence in your product story.

The Material Flow Checking

From Filament to End Product:
A Fully Documented Supply Chain of our
REYBOTEX® Material

Our verification system isn't a single checkpoint - it's a comprehensive process that ensures integrity at every critical juncture in the supply chain.

The Power of Documentation

A Paper Trail That Tells Your Story

Every REYBOTEX® supply chain verification creates a comprehensive archive of documentation that proves your sustainability commitment.

- Checking valid GRS certifications for each factory involved
- Material receipts and delivery documents
- Production approvals and quality checks

This isn't just compliance - it's **competitive advantage**.

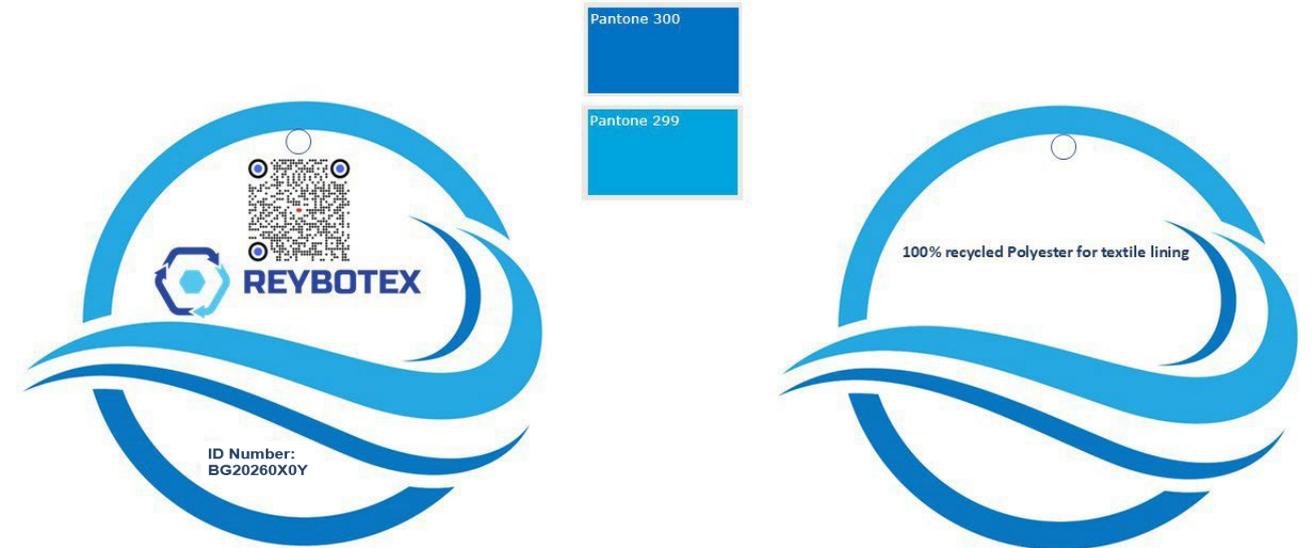

The Consumer-Facing Symbol

The REYBOTEX® Hangtag

A Simple Label with a Powerful Backstory

This hangtag is the final piece of the puzzle - the consumer-facing symbol of our entire supply chain verification process.

Each tag features a **unique ID Number** that connects the final product back to the fully controlled supply chain.

It's not just a tag; it's a **Promise of Integrity**.

This number is the key that unlocks transparency, allowing customers to trust that your promises are backed by rigorous verification - not just good intentions.

Real Supply Chain. Real Verification. Real Impact.

Material Flow Verification (MFV)

For products made with REYBOTEX® material and productions certified to Global Recycled Standard (GRS)

Traceability

Every gram of material tracked from source to final product

Disclaimer

The REYBOTEX® Material Flow Verification is an internal traceability and documentation system developed by BRINGTON GROUP to ensure full transparency and integrity across our recycled PET supply chain. This system is designed to provide detailed, step-by-step verification of material origin, processing, and final product composition in line with emerging regulatory frameworks such as the **European Digital Product Pass**.

REYBOTEX® verification is a **brand-specific documentation process** and is not intended to replace, compete with, or be equated to third-party certification schemes. We respect and acknowledge the valuable role of independent certification bodies in the sustainability landscape. Our system complements existing certifications by adding an additional layer of documented traceability specific to the REYBOTEX® supply chain.

All claims related to material composition, recycling content, and supply chain integrity are supported by our internal verification protocols and are specific to products carrying the REYBOTEX® brand.
