

RAPID SHUTDOWN SYSTEM

RELAY BASED

SWITCH

- ✓ Price Competitive
- ✓ No MLPE, simple
- ✓ Top Quality
Top quality relay, min components
- ✓ Flexible Multi-Purpose
Use as many switches as needed
- ✓ High Reliability

- ✓ Simplicity
No Power Line Communication, no transmitter and receiver, easier installation/maintenance
- ✓ Top Safety
Less DC connectors and much less high voltage cable, lower fire risk, top safety with air gap, relay vs semiconductor safety

MONITEK POWER SUPPLY

480VAC Powered, 24VDC/2A max output.
RSD is initiated either by AC power loss or by loss of input signal

- For 12 Switches
- External trigger input for RSD or for optional shutdown

SWITCH

24VDC-Powered, OMRON 1000VDC rated electro-mechanical relay

- No MLPE. Relay and protection circuit only
- Very low component count
- No signal interference with inverters
