Executive Summary

As a district leader, I successfully raised literacy scores by more than 20% over four years through a methodical and thorough approach. Central to this success was supporting teachers in learning and applying effective instructional strategies. Crucially, identifying teacher leaders who are committed to this initiative ensures the sustainability of literacy improvements over the long term. This approach not only boosts immediate results but also builds a foundation for continued progress in literacy education.

Goals	Objectives
Year 1	Focus on curriculum alignment and professional development for teachers.
Year 2	Implement and pilot instructional methods and materials while leveraging existing classroom resources to maximize impact on student learning. Classroom coaching and modeling.
Year 3	Continue to enhance instructional practices and empower teacher leaders to assume coaching and support roles for all teachers.

Scope

Our collaborative efforts aim to enhance teacher knowledge and development by integrating best practices and research into instructional practices and material selection. This will be achieved through a blend of traditional

professional development sessions, in-classroom modeling and coaching, debrief sessions, and continuous exploration of research in the science of reading. By leveraging these methods, we aim to empower educators with the tools and insights needed to effectively support student learning and achievement in literacy.

Faculty will attain comprehensive knowledge of the science of reading.
Faculty will enhance their understanding of effective instructional strategies.
Faculty will acquire the expertise to select or adapt curricular materials that align with best practices and
current research.
Faculty will develop proficiency in using assessment data to personalize instruction for individual students.
Over a three-year period, student assessment results in literacy will demonstrate measurable improvement.

These deliverables outline our commitment to equipping educators with the necessary knowledge and skills to foster enhanced literacy outcomes among students through evidence-based practices and ongoing professional growth.

Assessment Data

Please provide information on the assessment data used in the district.

Grade Level	Assessments	When are the assessments given to students?
Kindergarten		
First Grade		
Second Grade		
Third Grade		
Fourth Grade		
Fifth Grade		
Sixth Grade		

✓ Milestones

Milestones are a great way to ensure we remain on track for faculty and student success.
