**RE:** Announcement – August Opening

---

Dear EPEC Community,

On behalf of everyone at EPEC, I am excited to announce that **we will be opening this coming month (August)** and starting transfer station operations for our communities.

Since we acquired the plant just over 16-months ago, we have overcome some incredible challenges, but we could not have overcome these challenges without the overwhelming support we have received from our communities. Over the last six months I have had the privilege of attending Select Board, City Council, and even Annual Town meetings for our communities. Municipal government relies on the countless hours given by staff, community members, and volunteers. It is humbling to see just how much so many of you give to make our communities work. It is just as humbling to the level of dedication you have all shown to us as we finalize the remediation process and transition into an operational stage.

We will be sending each community their individual start date for when they will be able to begin bringing material directly to the plant, this includes MSW, C&D Debris, Bulky Waste, Tires, and other acceptable waste under your contract. I want to reiterate that this August opening does not replace our plans to bring the boilers back online. By bringing material in for transfer, it allows us to train staff, hire new personnel to run critical operations such as the scale house, and reduce the burdens of transport to the landfill.

Please be on the lookout for your individual community letter and if you have any questions, please feel free to contact me at [ecoleman@epemain.com](mailto:ecoleman@epemain.com) or on my cell at 207.217.8908. While we still have so much to accomplish, the path ahead has never looked so bright.

Sincerely,

Evan C. Coleman
