

Website RFP Questions 8.5.24

What is the budget for this project?

We have budgeted between \$10,000 - \$15,000 for this project.

Are there any integrations you need but don't currently have on your website? Specifically, I noticed a calendar is mentioned in the RFP but not on the website as of now.

Currently, we anticipate the need for an events calendar and potential map integrations. We are seeking the expert guidance of the selected firm to help translate our organizational functions into technical integrations.

Regarding the user sign-in, which wasn't mentioned in the RFP, could you clarify its intended use and if you plan to include it moving forward? This will impact the overall cost of our proposal.

This is a default setting on our current platform and does not serve a purpose. It will not be needed moving forward.

Do you anticipate any changes in how content is organized? For example, the corridor improvement section.

We are seeking the expert guidance of the selected firm to help construct an information architecture that is best practice. Content organization is subject to change.
