

Software Production Release

Product:	<u>Loader.exe</u>	Software No.:	<u>9700-20970 V4.0</u>
Engineer:	<u>H.Davatz</u>	Prev. Version:	<u>V3.5</u>
Date:	<u>27 April 2011</u>	Dist. Media:	<u>Electronic</u>
Archive:	<u>DarkStar</u>	Last Beta:	<u>9700-81692 p16 USB</u>

Changes from 9700-20970 V3.5

- Added support for USB connection to KCM. Version numbers for PC programs Loader.exe, SmartConfig.exe, and ParamStore.exe starting with 4.0 support USB.
- Now this program may be installed by a user that is not an administrator. The program is no longer located in C:\Program Files\K-Tron Tools (English) or C:\Programme\K-Tron Tools (German) etc. Now the folder where the program is stored is: Documents and Settings/username/Local Settings/Application Data/K-Tron Tools.
- Bugzilla 228 was fixed. In some cases Loader fails to open a *.img file. This happened when trying to program KSL V4.1. The message that popped up says: "an unnamed file was not found". It turned out that Loader V3.5 could not open a file that has the READ-ONLY attribute set. Now it can.

Open Bugzillas or ESTRs

None.

Compatibility List

Product supported by Loader	Software Number	Revisions
SCM Bootstrap/Utility (BIOS)	9700-20960	All
KSL Bootstrap/Utility (BIOS)	9700-20959	All
KCM Bootstrap/Utility (BIOS)	0490020206	All

Known Incompatibilities

None known.
