The sun never stops at the Explorers Hotel!

If the Turtle party was ^{in charge} ~~in charge~~ of the country we would include every citizen in the UK. May I be so bold as to develop a new and safer government to give help to all of our different communities.

Environment

I request that all plastic items be abolished because sea creatures are ~~been~~ becoming extinct as a result of plastic. Every year, over 100,000 ~~innocent~~ sea creatures die from suffocating on the plastic that we have disposed on the beach. What have they done to suffer this fate?

NHS

^{Additionally}
Additionally, I urge that the NHS be given more funding to provide necessary care to people in need; far too many patients ^{are} being left to wait for hours in A+E, for example a 10 year old boy, who was bleeding from a gash in his leg, was left to wait nearly 2 hours. May I also request that more mental ^{1,175,203} health nurses be trained. Mental ~~with~~ health is an increasing problem in the UK. Some individuals are in desperate need of support.

but have been on a waiting list for months. This has to improve.

Conclusion

To conclude, you can make all this come true by voting for the Turtle Party. We will do everything in our power to make these necessary changes for you.

Plastic-Friend or Foe?

Can you imagine a world without plastic? Plastic has been in use for over seventy years. It is used in our every-day lives. Our wonder material, plastic, can be used to make almost any thing. However, this is killing animals and harming the environment. Every minute, a truck load of plastic enters the ocean. Take a minute to think... is plastic our friend or our foe?

The wonder material:

Since this material is versatile and easy to manufacture, it is used regularly. If we took all the plastic we use away we would struggle to live our daily lives. Just think... how many things do you use that contain plastic? A lot isn't it? How many plastic toys do you have at your house? This material can be reused and constructed to make more objects. Plastic saves lives in many medicines and machines.

What are the down sides?:

Plastic takes a long time to decompose. Surprisingly, plastic

does not actually decompose fully, it only breaks down into little particles called micro-plastics. How do you think this affects the sealife and its habitat? Firstly, birds are mistaking plastic for food and then they are feeding their young plastic. Secondly, ^{their} young are dying as this is going into their blood stream. Think about a world with no birds. I bet you can't, can you? Did you know, over sixteen million single-use plastic bottles are used every day alone in the UK? That is lots isn't it! Plastic can be found in some unexpected places: in your food, in your clothes and in hospitals. Enjoy chewing gum? Some chewing gums contain plastic! Would you believe, over 90% of a beach is plastic, however only 10% is sand, rocks and pebbles. We need to stop this.

How can we combat this huge problem?

How can we help prevent this problematic material from ruining our planet? How about encouraging other people to use less plastic? I think that would be a great idea. We would write like a team and try to combat this from happening. There are lots of ways we can help: recycle; put paper, card and clean plastics in a recycling bin;

try to put produce in paper, canvas and other healthy-fibre bags, use pens that refill and attempt to not put your rubbish in the gutter.

Could you imagine a world without sea creatures? I bet you *can't*. If we continue at this rate all of our sea life will die then there will be no beautiful creatures left. If we can all make an effort to make a difference we could save our sea creatures.

Visit Pompeii - A City Frozen in Time

Have you ever wanted to see a real Roman city? If so, Pompeii is the place you need to visit! This amazing site was destroyed nearly 2,000 years ago by one of the most famous volcanoes in the world - Mount Vesuvius.

Mount Vesuvius is still an active volcano and it last erupted in 1944, but it's most known for its deadly eruption in 79 AD. When it erupted, it sent clouds of hot ash, rocks and gases flying into the air. The whole city of Pompeii was covered in thick ash. People didn't even have time to escape; they were trapped exactly where they were. That's why Pompeii is so unique: it was perfectly preserved under the ash for centuries.

When you visit Pompeii today, you can actually see the damage that the volcano has caused. Walk through the streets and see broken buildings, walls blackened by ash, and even casts of real people who were caught in the eruption, it's shocking and fascinating to look at.

Do you want to learn more about Roman life? Admire the Roman bathhouses, bakeries, gardens and even a huge amphitheatre where gladiators fought. It makes you feel like you've gone back in time. And with Vesuvius in the background makes the whole experience more exciting.

One of the most interesting places in Pompeii is the Villa of the Mysteries. It's a huge Roman house with colourful wall paintings. The marvellous wall paintings show people doing strange rituals, some people think they part of a secret religion. It's amazing that they have survived all of this time and you can still see the details up close.

Another place you shouldn't miss an opportunity to visit is the forum, which was the heart of the city. There are temples, markets and even a building that was used for important meetings. You can also visit the public baths where Romans would go to relax and get clean. The stone benches and even the drains are still there. It's just like walking into the past!

So if you want to learn something amazing, feel something powerful and see one of the most interesting places in the world Pompeii should be top of your list.
