## Capability Statement

### Company Overview

Founder of D-Engine spent a decade as a technology leader in federal government and another decade providing technology consulting services to corporate America. Applied broad technical expertise, project management methods, and deep understanding of business functions to assist clients, across multiple industries globally, to implement end-to-end ERP solutions, digital transformation, e-Commerce, n Tier Applications, web technologies and cloud based applications that deliver increased productivity, scalability, information accuracy, timeliness and compliance with regulatory requirements for a highly mobile and diverse workforce.

### Expertise

Professional expertise in technology project management, ERP strategy, program management, cyber security, FISMA, FEDRAMP, NIST and SOX audits. Experience in implementing PeopleSoft, Workday, SAP and Oracle EBS for government agencies, Telecom, utilities, entertainment industries and financial institutions. D-Engine also owns "D-Engine" framework to help organizations to strategize disciplined transformation to generate synergy through design thinking approach and agile methodology.
