

[centerpointconnect.com](http://centerpointconnect.com)

Centerpoint Connect is an established SaaS company with dedicated and passionate people and we are looking to expand our development team. We offer an entire front end system for roofing contractors to run their business which includes: CRM, sales workflows, mobile workflows, billing, project management, estimating, and more.

With a well recognized presence in the market, our web applications are effectively impacting the industry we serve with an innovative edge. As we continue to grow there is tremendous potential to expand the existing platform as well as other verticals in our industry.

We are seeking the right full stack developer to build out our core team who is looking for a career and wants to grow with a great company. It's important for us to hire someone who fits the culture of our business first, but can also help us execute and continue to bring new features and expansion to our platform.

Ideally this person would have all of the below skills and abilities however all is not required, we are willing to invest with on the job training or additional resources for the right person joining our team.

**Technology Requirements:**

- PHP
- MySQL
- HTML & CSS
- Javascript

**Preferred Team Skills:**

- Strong knowledge of RET APIs including JSONAPI
- Familiarity with Git, Docker, Bitbucket, Clickup and other management tools

**Preferred Development Skills:**

- Strong knowledge of Laravel
- Strong knowledge of Angular or other front-end frameworks
- Experience with Typescript
- Experience developing with APIs

(Continued on page 2)
