## **Membership in the Moshannon Creek Watershed Association**

The Moshannon Creek Watershed Association is a non-profit corporation chartered in Pennsylvania. Moshannon Creek is a beautiful stream with often terrible water quality. Much of the main stream and some of the tributaries of Moshannon Creek are contaminated by mine drainage from abandoned coal and clay mines. Moshannon Creek's headwaters, and many of the tributary streams in the Moshannon Creek watershed, have clean water and wild trout populations. Our mission can be described very simply as protecting the clean water streams and improving the streams with tainted water.

Dues for membership in the Moshannon Creek Watershed Association are renewed annually. Dues amounts were established for 2020 by the board of directors. To join MCWA, please complete the form below, select the desired form of membership, and return this completed form with the dues amount to our mailing address above.
