Parts of the

Circulatory system

Parts of the heart

1. Aorta
2. Pulmonary artery
3. Pulmonary vein
4. Left atrium
5. Left ventricle
6. Right atrium
7. Right ventricle
8. Superior vena cava
9. Inferior vena cava

HEART

a muscular organ that pumps blood

VEINS

transport blood from different parts of the body to the heart

CAPILLARIES

circulate blood, nutrients, and oxygen to cells of different organs; connect arteries to veins

ARTERIES

transport blood from the heart to different parts of the body

The circulatory system is made up of around 60,000 miles (96,500km) of blood vessels!
