

This workshop is a part of the **Exploring the Vagal Nerve for Wellness Series**. It was created based on the findings of Polyvagal science, Heart Math Coherence and progressively elevated stress response patterns in many people. Susan found significantly improved results, interesting ripple effects on overall wellness in clients when adding tissue releases integrated with vagal tone focus.

Integrative Fascial work, the cranium & unwinding stress for deeper healing

A 2 day course for bodyworkers in learning integrative fascial techniques and supporting the ventral vagal path to wellbeing

This course covers:

- Learning practical fascial techniques for releasing the facial cranium specific to the mandible, zygoma, occipital and temporal regions.
- Understanding on how these areas contribute to sinus problems, TMJ & vestibular issues.
- Introduction to Visceral Release and the basics on biome health in bodywork.
- Integrating a vagal breath technique with somatics as part of your session and as post treatment support
- Why “non-force” techniques can work to get into deeper structures and bone release and how to integrate fascial unwinding into your skill set and sessions.
- Identify nervous system loops in fascia and work with releasing them to address repeating patterns or held energy imprints
- going deeper segment to practice integration of the learned material so it can be used immediately in clinic settings

Workshop Details:

This is a 13 hour in person and hands on workshop presented by Dr. Susan O'Leary from 9:30-5:30 and 9:30-430 the 2nd day

***CMTNL approval for Cat A CEU's**

also CEU approved :MTANS ,PEIMTA, CMTNB , Atlantic physio branches

REGISTER via the shop page

Cost : \$450.00 +hst

final workshop details and registration form will be sent via email from

Some testimonials:

-I absolutely loved the classes , the breathing has been my go to on my lunch breaks and things I didn't know were bothering me are releasing .Having these tools is exactly what I needed. MF

-It was such pleasure to be in attendance . I learned much more than I expected and I'm very excited for the next event . BD

-Thanks to you Susan ! I am using the breathing and I also shared it with some clients who are reporting relaxation greater than they have ever felt in a session before. JD

-I learned a lot and I really enjoyed your informal and inclusive teaching method. I have already started using the breathing technique and some of the fascial release techniques in my clinic last week and the results in some patients have been remarkable. It is very interesting work and easy to incorporate into my existing treatment regime. Joanie Cranston PT

Thank you Susan,

I am so grateful for the opportunity to meet and learn from you. I really enjoyed the courses and the horses especially. KP

-Try one workshop, do this one thing for yourself and just try. PF

About your Instructor

- Susan is a Dr of Chiropractic who has been using fascial techniques since her time in CMCC in Toronto. Her style is an integration of what was learned from her mentors at CMCC in cranial-sacral work and visceral manipulation , courses with the Upledger CST and John Barnes MFR. Her work has also in recent years expanded into training to work on horses and using integrative bodywork in what is now being called “sub-threshold techniques” that work with the nervous system to create tissue and systemic changes. Susan also has yoga teacher training and has been a yoga student for 25 years and this informs her approach and integrative style. In her undergraduate days, Susan graduated from MUN with a BSc in Psychology where she focused on neuroscience .This was the starting foundation of her interest in studying the effects of the nervous system on healing, wellness and what we now call self care with our clients and ourselves as therapists. Over the last 25 years of her time as a healer and bodyworker, she has explored many courses on mind body wellness and techniques, including the endorphin effect with William Bloom in the UK, and the Polyvagal theory of Stephen Porges. As a wellness professional she has been an owner and partner in several wellness and integrative medicine clinics, and as a former high performance athlete in the sport of curling , she was able to learn how to manage the effects of adrenal stress on performance, tools for recovery, and management of flow of training for optimal results. Susan uses this mix of experiences to create and inform programs applicable to many performance needs , and in continued curiosity of how we can evolve our understanding of supporting people in healing, recovery and creating a healthy planet.
