Hybrid Cloud - WIFM

Wednesday, April 7, 2022 - 6:00 PM - 7:00 PM
Online Event (ZOOM)

"Technology leaders can avoid making these trade-offs by harnessing the right combination of IT solutions in their hybrid environment—ranging from on-premise platforms, edge nodes, and cloud services. But no matter how powerful, technology on its own is insufficient to achieve acceleration"

Source: McKinsey

Craig Parker

Craig Parker is an Entrepreneurial digital transformation Leader who is the Head of Hybrid Cloud Europe at Fujitsu and member of Fujitsu Western Europe Leadership team.

After successfully leading and growing the Integrated Systems Business across EMEIA and creating the PRIMEFLEX brand for 5 years, is responsible now for the next strategic growth area for Fujitsu Hybrid Cloud, helping Fujitsu to become a Digital Transformation (DX) company. For the Integrated Systems business was responsible for P&L, for defining, developing and launching the PRIMEFLEX Virtualization - Converged and Hyper-converged, Cloud and Big Data Solutions.

.

6:00 pm Welcome

6:05 pm Intro – Hybrid Cloud WIFM

    Craig Parker

    Pedro Pinto

6:35 pm - Azores Cloud

    Eng. Pedro Batista

6:50 pm Open debate

7:15 pm Thanking notes & Wrap Up

    Rui Serapicos

> *"This marriage of open source and hybrid cloud technologies unlocks valuable benefits. Open source is the key to a more flexible hybrid cloud strategy (89% of respondents)."*
>
> *Cynthia Hicks, Forrester*

> *"Standard policies across hybrid environments (for example, on-premise and cloud) lead to better compliance at lower cost. These companies can quickly respond to and mitigate emerging business risks by consistently pushing policy changes out across their hybrid operating environments."*
>
> **Arul Elumalai and Roger Roberts McKinsey**

> *"IT leaders need to formulate a cohesive cloud strategy that is expansive and forward-looking to fully reap the business value of cloud"*
>
> *John McArthur, Senior Director Analyst, Gartner.*
