

terra

The Terra collection was created out of the need to design an inspiring space that combines closeness to nature, education, and uninhibited play. The idea for this unique series stemmed from our passion for promoting values that contribute to the holistic development of children. In the Terra collection, we have combined the principles of Montessori and Reggio pedagogy, creating products that inspire children to explore the world and learn through practical experiences. As a result, children have the opportunity to develop their skills in an atmosphere of respect, independence, and curiosity. Terra supports and provides opportunities for independent action, fostering a sense of responsibility and autonomy.

Colours

Construction

Plexiglass panels

Construction

Pine wood boards, 2.0 and 2.5 cm thick, vacuum impregnated.

Transparent Panels

Made of durable Plexiglas, 12 mm thick (found in Paint Boards and Rainbow House).

Containers

Made of highly durable, weather-resistant plastic.

Anchoring

All devices are free-standing, which makes it possible to any arrangement of space.

Ergonomics of packing and shipping

Products for self-assembly. Flat-packed on EUR-pallets.

Branding

The Terra collection products have original branding.

Collection features

Age of users

Natural, impregnated wood

Complete the playhouse with soft pillows, a blanket, or a rug, add decorative lights, and transform it into a calming oasis.

NOVUM Sand Laboratories, with their thoughtful design and colorful aesthetics, are perfectly suited to the needs of young children. The compact size of these devices makes them safe and accessible for little ones just beginning to explore the world. The ideal location for installing these unique tables is near sandboxes, where the natural material for play is easily accessible. Moreover, the Sand Laboratories are designed for versatile play. Although sand is their main medium, these tables are perfect for playing with pebbles, leaves, sticks, and other natural elements that children can find outdoors.

Urbi N

The URBI collection is a new line of urban playgrounds. The design of the equipment comes in two options – on wooden posts in walnut color or metal ones available in three modern colors, perfectly suited to the character of urban landscapes.

Within the URBI collection, we find sets for children of various ages – from small, low structures for the youngest, to larger, more complex sets offering plenty of challenges for older users. These sets provide versatile play, stimulating physical development, creativity, and social interactions among children.

Yerto

The solid yet lightweight design of the Yerto collection not only impresses with its modern aesthetics but, most importantly, encourages carefree play, bringing joy to the youngest users. The structure is based on stainless steel posts, resistant to weather conditions, finished with elegant, uniquely tapered caps made from high-quality plastic. At the highest points of the sets, we can see beautiful, durable HPL laminate leaves, with a linear motif also featured in the safety barriers. The minimalist color scheme, carefully selected and well-combined materials, along with the open-frame structure of the equipment, ensure that the collection fits perfectly in both intimate and larger public spaces.

Colours

Construction

Roofs and safety panels

Slide sides

Construction

Load-bearing posts made of stainless steel with a diameter of 76.1 mm, finished with distinctive HDPE 19 mm covers.

Platforms

Made of anti-slip HPL panels with a thickness of 12 mm, mounted on a metal frame.

Safety panels and decorative leaves

Panels made of 8 mm thick HPL laminate.

Slides

Slides made of 1.5 mm thick stainless steel, with sides made of 19 mm HDPE and 8 mm HPL laminate.

Additional elements:

- 16 mm polypropylene ropes with a steel core;
- high-quality climbing stones.

Anchoring

Directly in the ground.

MPZ is a complete, ready-to-install playground based on a modular construction system that allows for installation directly in the ground WITHOUT THE NEED for any earthworks. MPZ eliminates the need for complex, multi-layered, costly foundations made of aggregates, as well as the requirement to lay foundations for the equipment. The system features a safe SBR+EPDM rubber surface, as required by the EN 1177 standard.

This solution **SIGNIFICANTLY REDUCES** installation costs and **SHORTENS** the construction time!

The design is based on leveled anchors mounted on the ground, to which frames with safe surfaces and playground equipment are attached. The individual components will be delivered to the construction site in the form of ready-made prefabricates, designed for quick assembly on-site using connection elements. The developed technology allows for a significant reduction in the time needed to build the finished playground.

MPZ also enables easy disassembly of equipment for relocation to other areas and greatly simplifies necessary repairs (a damaged module can be easily removed and replaced with a new one without the need to close the playground for many days).

Colours

Construction

Roofs and safety panels

Slide sides

Developed structure

It is based on leveled anchors screwed into the ground, to which frames with safety surfaces and play equipment are attached.

Equipment construction

Load-bearing posts made of stainless steel with a diameter of 76.1 mm, finished with distinctive 19 mm HDPE covers.

Safety panels and decorative leaves

Panels made of 8 mm thick HPL laminate.

Anchoring

Platforms made of anti-slip HPL panels with a thickness of 12 mm, mounted on a metal frame.

The playground is delivered with a complete set of equipment and fencing!
