

TRIANGULO

The new TRIANGULO collection features modern design, durability, and innovative construction solutions. The equipment's colors and shapes are inspired by nature. The open-frame safety barriers and canopies evoke organic forms and shapes. The structure of the equipment encourages active play, obstacle overcoming, and the improvement of physical fitness and coordination.

Construction

Roofs and safety panels

Slides

Construction

Double-grooved, square 90x90 mm posts made of core-free wood, vacuum-pressure impregnated.

Platforms

Made of pine wood planks, with dimensions of 75x75 cm.

Roofs and safety panels

Made of durable 8 mm high-pressure laminate (HPL).

Slides

Made entirely of polyester laminate.

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core.

Anchoring

Posts mounted on galvanized steel anchors that isolate the wood from the ground. Anchored below ground level.

The QUECO collection is a unique line of equipment where plant motifs and charming bird characters create a cohesive, friendly aesthetic, perfectly blending with the natural surroundings. Each element – from the structural posts to the decorative details – is made from recycled materials to show that modernity and ecology can go hand in hand. The equipment in the Queco collection not only provides excellent play but also offers educational value.

Interesting crossings, manipulative walls, and slides provide safe and engaging challenges. The entire collection is maintained in a subtle, natural color scheme, enriched with accents of brown, green, gray, and delicate shades of orange and yellow. It's a remarkable space where play and ecology come together to create one unique place.

Roofs and safety panels

Slides

Construction

Load-bearing posts 90 x 90 mm, made 100% from recycled materials (composite obtained from a combination of used textiles and plastic waste).

Roofs and safety panels

- green 100% recycled (15 mm HDPE made from fishing nets);
- gray HDPE 70% recycled.

Platforms

Non-slip platforms 18 mm on metal frames.

Slides

Stainless steel sliding surfaces with a thickness of 1.5 mm, sides made of 100% recycled HDPE (15 mm, produced from fishing nets).

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core.

Anchoring

Directly in the ground.
