Creative new ways to play!

Actively

Healthy

Safely

We are proud to present our latest innovations designed especially for the youngest - spaces where children can grow safely, explore the world, and experience amazing adventures every single day.

Our latest offerings are the result of carefully listening to the needs of children, parents, educators, and an ever-changing world. They combine eye-catching design with exceptional functionality, making them the perfect choice for both intimate play areas and large, fully equipped playgrounds.

Each collection stands out with its own unique character - from the natural aesthetics of robinia wood, through the sensory exploration of the Terra line, to the modern and dynamic style of the Ninja Workout sets. We use only certified, durable, and environmentally friendly materials to ensure safe play for years to come.

On the following pages of this catalogue, we invite you into a world where every structure has its own story and every detail matters. Whether you're planning to create a cozy corner for toddlers, a multifunctional playground for the entire community, or a professional obstacle course for teenagers - our latest innovations will open the door to limitless possibilities.

Because joyful play is the foundation of a bright future for every child!

Novum Team

NOVUM PLAYGROUND CREATOR

The NOVUM Playground Creator allows you to independently design the playground of your dreams.

HOW DOES IT WORK?

Choose your space

playtown ROBINIO

Welcome to Robinia PlayTown – Where Creative Play Comes to Life!

Step into the enchanting world of Robinia PlayTown, a unique collection that inspires children to explore, imagine, and learn through play. This imaginative series invites young adventurers to take on real-life roles and develop their creativity in an engaging, storybook-like setting.

A brand-new highlight enriching the collection is the impressive Robinia Town Hall - the central gathering place of the town. Designed as the heart of the community, it features slides, observation decks, and interactive zones that spark collaboration and shared fun. The collection has been thoughtfully expanded with charming themed playhouses such as the Fire Station, Post Office, Train Station, and Police Station - each crafted to encourage immersive role play and educational interaction. These distinctive elements help children discover everyday professions, expand their vocabulary, and build social confidence.

To complement the core structures, Robinia PlayTown also includes a variety of playful add-ons: colorful spring riders, educational activity boards, and interactive games like the Wheel of Fortune or the Robinia Post Puzzle - all designed to stimulate the senses and support motor development. Crafted from natural robinia wood, this collection not only ensures durability and sustainability but also brings a warm, organic aesthetic to any playground.

ROBINIO

Robinio – Where Play Meets Nature!

The Robinio collection has been expanded with exceptional sets built on posts made of robinia wood - a material known for its outstanding durability in all weather conditions and naturally aesthetic appearance. Each set features a unique form and soft, earthy tones that blend perfectly into park landscapes and green spaces.

In response to the growing need for active development, we are introducing a brand-new line of Robinio fitness equipment. These professional obstacle courses and activity trails enhance coordination, strength, and balance while offering children exciting challenges. The robust acacia logs used in the construction ensure not only great fun, but also the highest level of safety and long-lasting durability.

The new Robinio small architecture elements are the perfect complement to any space. Design-coordinated benches with backrests and waste bins allow for the creation of a fully functional and comfortable relaxation area for children and their caregivers - all while maintaining the collection's unique, natural character.

The new Robinio offerings are an investment in quality, timeless design, and the all-round development of children.

terra

Terra – A Space for Creative Exploration!

The Terra collection is reaching a new level! We're expanding it with additional elements to better meet children's natural need to explore the world. The latest products harmoniously combine physical development, environmental education, and creative expression in the open air.

We proudly present an all-new line of Terra obstacle courses, designed to help children develop agility, balance, and motor coordination. These sets allow for customizable configurations tailored to the age and abilities of the children, encouraging safe and active play.

Nature enthusiasts will love the wide range of bird feeders and insect houses, allowing children to observe and learn about local wildlife directly on the playground. The new collection also includes mud play tables with compartments and containers - a perfect opportunity for spontaneous sensory exploration in line with Montessori principles. Additionally, the range has been expanded to include practical tables and benches for both children and adults, ensuring comfort during shared moments, as well as a dedicated drawing table to spark children's creativity.

Test your skills!

MILO – an invitation to a safe world of play!

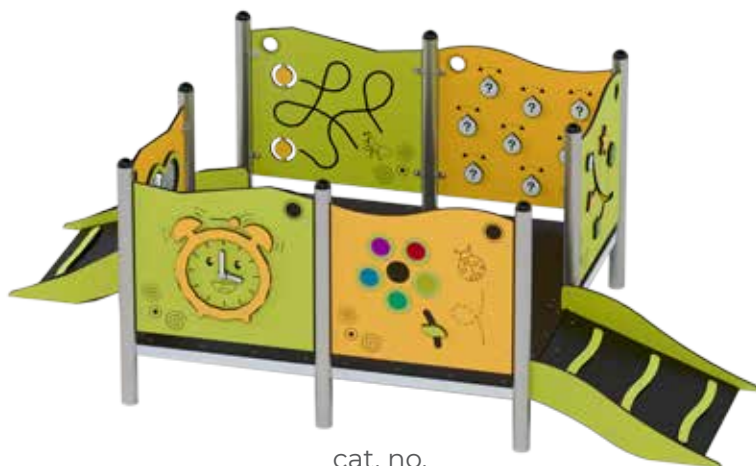

The Milo collection is a special invitation for the youngest explorers taking their very first steps on the playground. Its signature features are cheerful, energetic colors in sunny and lime tones that naturally catch children's attention and brighten up any space, creating a warm and joyful atmosphere.

While designing Milo, our top priority was the comfort of little ones. The low, extra-wide platforms with anti-slip surfaces provide a strong sense of stability, while gentle slides and easy-to-climb entrances encourage independent, safe play - helping children build confidence and a sense of autonomy.

The reliable construction of the equipment, based on sturdy stainless steel tubes and durable, colorful HDPE panels, ensures resistance to intensive use and guarantees many years of joyful play. The functionality of the sets is enhanced by numerous activity panels and sensory elements that spark children's curiosity, stimulate their senses, and support healthy early development.

Urbi

URBI – Modern Play in an Urban Style!

The Urbi collection is a line of playgrounds designed with the dynamic nature of urban landscapes in mind. Its greatest advantage is flexibility: the equipment structures come in two options - wooden posts in a warm walnut tone or metal posts available in three modern color variants that perfectly complement contemporary architecture.

The URBI range includes sets designed for children of all ages - from small, safe structures for the youngest to more advanced configurations that provide exciting challenges for older kids. Each set offers versatile play opportunities, promotes physical development, sparks creativity, and supports the growth of social skills.

The collection is complemented by spring riders perfectly matched to the series' overall design, offering a cheerful and visually cohesive addition to any playground.

Urbi is a symbol of modern design and freedom of choice. With this collection, you can create a unique, safe, and engaging space that perfectly fits the character of any residential area, park, or school courtyard.

NINJA WORKOUT

Ninja Workout – A Modular Adventure Full of Challenges!

The Ninja Workout collection features modern obstacle courses that combine dynamic play with professional fitness training. Its unique advantage lies in its modular design - allowing users to configure a course perfectly suited to their abilities and training goals. With a wide range of individual modules to choose from, everyone can create their own personalized Ninja setup.

Each Ninja Workout module is characterized by durability, safety, and precision craftsmanship. The robust steel structures feature a variety of obstacles, such as moving bridges, climbing walls, bars, and balance platforms. These elements help users develop strength, coordination, agility, and endurance - allowing them to gradually increase the level of difficulty and overcome their own limits.

Ninja Workout is more than just a workout - it's a creative challenge that anyone can design to fit their own needs, creating a unique Ninja course that never gets boring!
