# We design joy

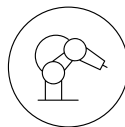

We create spaces that develop, integrate and inspire

At Vinci Play, we've been designing, manufacturing, and installing safe and incredibly engaging playgrounds for almost 20 years. We prioritize aesthetic and imaginative design that stimulates children's unbridled curiosity and encourages shared play. Our products serve children and adults in over 60 countries. Thanks to the continuous development and perfecting of our internal tools, we offer numerous features that make designing shared spaces even easier. We provide our partners with a 3D Planner, an Arena Configuration Planner, and an advanced ordering system that allows

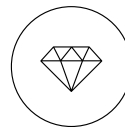

for quick and easy equipment completing. Our mission is to create shared spaces so that they are versatile, serving not only aesthetic but also entertainment purposes, fostering community integration. We strive to ensure that the design of our equipment aligns with the latest trends in urban architecture while maintaining an engaging form.

200 mln  
of happy kids

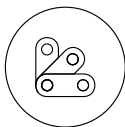

Advanced  
production processes

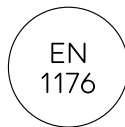

High  
quality

Up to 30 years'  
guarantee on components

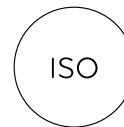

2800 material  
variations

Compliant with  
safety standards

Over 60 countries  
all over the world

ISO and TÜV  
certificates

# What makes us unique

Advanced production processes!

From design, through production, to shipping, at every stage our priorities are the highest quality and safety of the playground. In the production process we use only certified materials, and a multi-stage quality control system guarantees that all elements of the products that leave our production line meet strict safety standards. We employ the best specialists who ensure a high standard

of production, reliable customer service and professional service of devices. Modern machinery and advanced production organization enables a quick 4-week order fulfillment. We are proud that thanks to the strict standards and quality safety procedures applied in our company, we can guarantee children, their parents or guardians carefree fun and relaxation on the playground.

Vinci Quality

## Customer service

Our Customer Service department operates guided by the highest standards of cooperation, confirmed by the ISO 9001: 2015 certificate. The employees of this department endeavour to respond to inquiries addressed to the company within the shortest time possible while meeting the expectations of even the most demanding buyers. We guarantee cooperation based on the understanding of the customer's needs and offer full support at every stage of the contract execution, during the warranty period and afterwards.

## Standards and safety

Children's safety is of the utmost importance to us, which is why all Vinci Play equipment complies with the EN 1176 European standard. The products also hold the TÜV Rheinland or TÜV SÜD certificate, which confirms their safety and high quality. Our high-end specialists support the Customer during the playground planning process to guarantee the compliance of the project with the applicable EU safety standards.

## Quality control

All the elements that make up the final Vinci Play equipment undergo a multi-phase and precise quality control to ensure that they comply with the EN 1176 standard. Our quality specialists use modern laboratory, as well as devices and measuring equipment to evaluate the quality of materials at every stage of production – from the acceptance of goods or components, through all manufacturing steps, all the way to packaging and preparation for shipment. Owing to regular controls and audits of our suppliers and contractors, we make sure that we cooperate only with verified companies.

# Safety first

Watch movie:

Our clients

The playground, fitness and workout equipment manufactured by Vinci Play is characterized by a refined style, attention to detail and design in accordance to European safety standards.

We subject all products to multi-stage verification with particular care before making them available, thanks to which we are sure that they are perfect, both visually and in the context of safety.

## Versatile playgrounds for everyone

Our equipment is characterized by high versatility, thanks to which it is adapted to various needs - the size of the playground, the age of the target group, budget or color guidelines. Our mission is to bring smiles to all users, including those with special needs. Thanks to integration playgrounds, everyone can experience the joy of play.

## Beneficial effect on children

Before designing new equipment, we conduct an in-depth analysis of children's needs, thanks to which playing on our equipment provides children with a lot of positive stimuli.

Graphics that arouse joy in children stimulate friendly emotions, eliminating fears and stress, which contributes to building a sense of security and inner peace. The cheerful illustrations created by our artists support the proper development of children's psyche, directly affecting the central nervous system. While playing on the playground, the youngest users gain their first experiences in forming relationships with others, learn to share, wait patiently, deal with emotions and cooperate in a group setting.

## Development of imagination

Unique structures and effective design take children to the land of smiles, providing them with an unprecedented range of emotions. Themed designs referring to ships, castles or other interesting places encourage creative play and active spending of time outdoors. All this helps in the development of a child's imagination and social integration.

## More and more ideas

We constantly follow the latest trends on the market and analyze the needs of children around the world. Thanks to this, we provide our customers with increasingly innovative solutions, while maintaining the highest quality. Vinci Play is a company of the future, where quality, safety and style combine into one to produce industry leading playgrounds.

# Play is ECO!

Watch movie:

Recycled series

A playground is a place where children spend time in carefree play, developing their imagination and improving their motor skills.

We make every effort to ensure that these spaces are not only safe and attractive, but also environmentally friendly. Ecological playgrounds are not just devices, but the entire ideology of the company, which takes care of sustainable solutions in the production process. Thanks to the increasing social awareness of eco-responsibility, we have access to many sources that help us create 'green' devices. In 2022, Vinci Play introduced a special "Recycled" series, which uses materials originating in the majority of percentage from consumer waste.

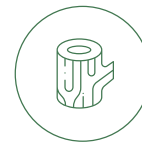

## Recycled plastic

We have replaced ordinary plastic with raw material made from used ropes and fishing nets. By using "green plastic", we reduce the amount of plastic waste on land and in the oceans.

## Textile waste

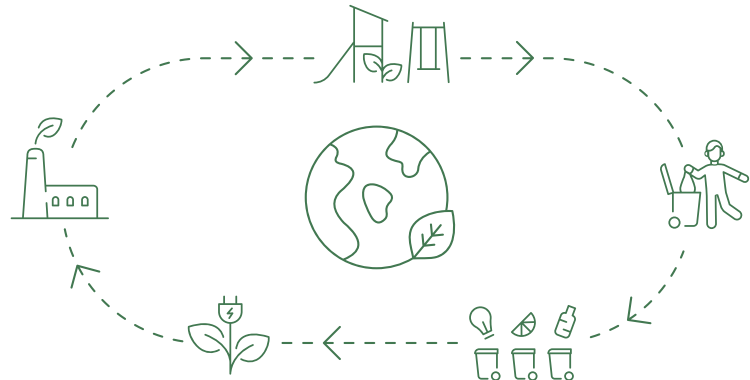

Our durable posts are made of used textiles and foil. Recycling clothes and bags is key to reducing carbon dioxide emissions and reducing waste in landfills.

## Wood

Our wood comes from controlled farms that care for biodiversity and ecological balance. Sustainable forest management prevents unfavorable climate changes.

## Why it is worth creating ecological playgrounds:

### Reducing CO2 emissions

The wood we use to produce playgrounds is a more ecological raw material than steel, aluminium or plastic. Using wood in production reduces the climate footprint.

### Promoting sustainable development

Children playing on Vinci Play playgrounds learn about environmental protection and responsible use of natural resources.

### Improving health and well-being

Contact with nature has a positive effect on children's health and well-being. Through ecological playgrounds, we encourage physical activity and spending time outdoors.

### Creating a pleasant place to play

We design playgrounds with aesthetics and functionality in mind, creating a friendly and encouraging environment for play.

### Reducing the impact on the environment

In the production process of ecological playgrounds, we use materials from recycled or renewable sources.

### Waste minimization

The materials from which we create playgrounds allow them to be reused after use.

## Environmental protection

Caring for the natural environment is an important aspect of our business activities. FSC® certificate number RINA-COC-000904: (FSC® license number C163573) confirms the use of materials from properly managed FSC-certified forests and other controlled sources. In all our activities, we are guided by the principles of sustainable development, including the selection of contractors and suppliers. We have an ISO 14001:2015 certificate, which confirms the implementation of an environmental management system.

# Sustainability at Vinci Play

At Vinci Play, we have been ensuring stable and sustainable growth for many years.

Operating on a global market, we understand how important it is to be aware when managing our social, environmental and organizational influences. We listen carefully to the opinions of our stakeholders, we look for new solutions every day and never lose sight of what is most important, such as values in business.

Sustainable development is one of the key foundations supporting Vinci Play's business growth strategy. We persist in efforts to ensure that our operational activities support the implementation of the UN Sustainable Development Goals. Our intention is to implement the assumptions of the ESG strategy by 2026, which includes 73 tasks that maximize our positive impact in the value chain. We reflect the global partnership for sustainable development in three pillars of responsibility: towards people, the planet and the

community. Each of them pursues specific goals that provide an answer to the expectations of our stakeholders: employees, customers, social and business partners.

We continuously invest in social potential, responsible resource management, and product safety and quality. We develop our portfolio in the spirit of a circular economy, we focus on the development of renewable energy sources and ecological education. We want our products to support the development of social bonds in every corner of the world. We believe in the power of collective partnership, which is why we are an active signatory to real changes in the world, guided by the maxim of "conscious participation in positive transformation for the good of future generations".

Iwona, Purchasing Manager

## For the People

Vinci Play aims to increase its efforts to support development of the company's employee potential. The company intends to implement numerous projects in the field of employee safety and health and diversity management. The goals we set for ourselves in this policy, among others, are: an increase in satisfaction of our employees and establishing partnership cooperation throughout value chain.

## For the Planet

We will intensify actions to mitigate the effects of climate change. We are planning the transformation of our offices and production plants. We will innovate in terms of designing and expanding the product portfolio focusing on a circular and low emission economy, as well as responsible use of natural resources. The goals we set for ourselves in this plan are, to name a few, measuring carbon footprint emissions, investing in renewable energy, increasing recycling and upcycling of waste.

## For Society

Vinci Play supports social connections and involvement. We intend to develop related projects with ecological education and supporting intergenerational integration and the development of social bonds in the places where we operate. The goals we set for ourselves in this regard include: improving the ESG management structure, raising standards ethics and respect for the rights of stakeholders.

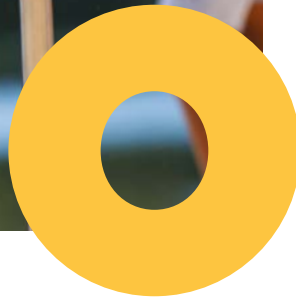

# Quality Guarantee

## TÜV Certificates

We cooperate with certification bodies - TÜV Rheinland and TÜV SÜD, which test our products and issue certificates for their compliance with the relevant standards. These documents are proof that our priority is to care for quality and safety. For Vinci Play devices that do not yet have certificates, we issue declarations of conformity, proving that they meet the requirements of the EN 1176 standard. When choosing our equipment, consumers are sure that they are trustworthy products that maintain high quality and safety standards.

## FSC Certificate

A certificate confirming our commitment to sustainable development. This mark informs about the specific origin of the wood, thus certifying that we are a company that takes a responsible approach when obtaining raw materials. Thanks to this, stakeholders are sure that we produce our products from pine and robinia wood by monitoring the supply chain. This means that the customer can trace the origin of the raw materials used to produce a given product, from the forest to the final product.

## Quality management system

The international standard ISO 9001 defines the management of an organization according to precisely developed criteria. At Vinci Play, the quality management system compliant with the ISO 9001 standard is based on: understanding the customer, leadership, the implementation process and the involvement and improvement of the entire production. By acting in accordance with these principles, contractors are certain of the quality of manufactured products and the clarity of the entire production process.

## Environmental management system

ISO 14001 is a standard regarding environmental management. Vinci Play, acting within its framework, takes care of environmental protection and responsible management of production processes. By implementing a specific environmental policy, our company minimizes the negative impact on the environment, being a transparent and socially responsible enterprise.

## Safety standards

EN 1176 is a whole spectrum of points and parameters related to playground equipment. The standards in this group define the requirements for the construction of the most harmless equipment possible, paying special attention to high safety standards for the youngest users, while providing them with conditions for development. At Vinci Play, the health and protection of children is of paramount importance for us, which is why we strive to safeguard the quality of our equipment. For products dedicated to young people and adults, such as workout and fitness, the relevant standard is EN 16630. In this case, as for playground equipment, the priority for us is both the functionality of the devices and their safety.

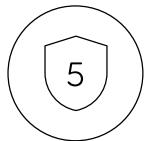

# Long-term Warranty

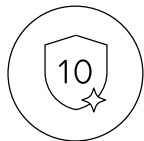

The highest quality of our products is ensured by experienced specialists and high quality materials. That is why we can offer our customers a long-term guarantee of fault-free and fully safe use of our devices. We also provide post-warranty services. Orders for most spare parts are completed within 48 hours.

## Selected warranty periods:

### **Year guarantee**

Corrosion resistance of stainless steel and hot-dip galvanized and powder-coated steel elements, resistance to bark beetles and rotting of wooden structural elements.

### **Year guarantee**

Structural strength of HDPE, 100% recycled HDPE and HPL elements; structural elements made of 100% recycled material (composite).

### **Year guarantee**

Durability of steel and stainless steel structures of mobile devices; durability of Robinia wood structural elements.

### **Year guarantee**

Durability of steel and stainless steel structural elements.

## Spare parts

The high quality of our products translates into their exceptional durability and, with proper maintenance, long service life significantly exceeding the warranty period. We deliver maintenance instructions to ensure long-term use. However, individual materials naturally wear out or can be sometimes damaged. Therefore, we understand that the availability of spare parts and a quick response to vandalism-related problems is crucial

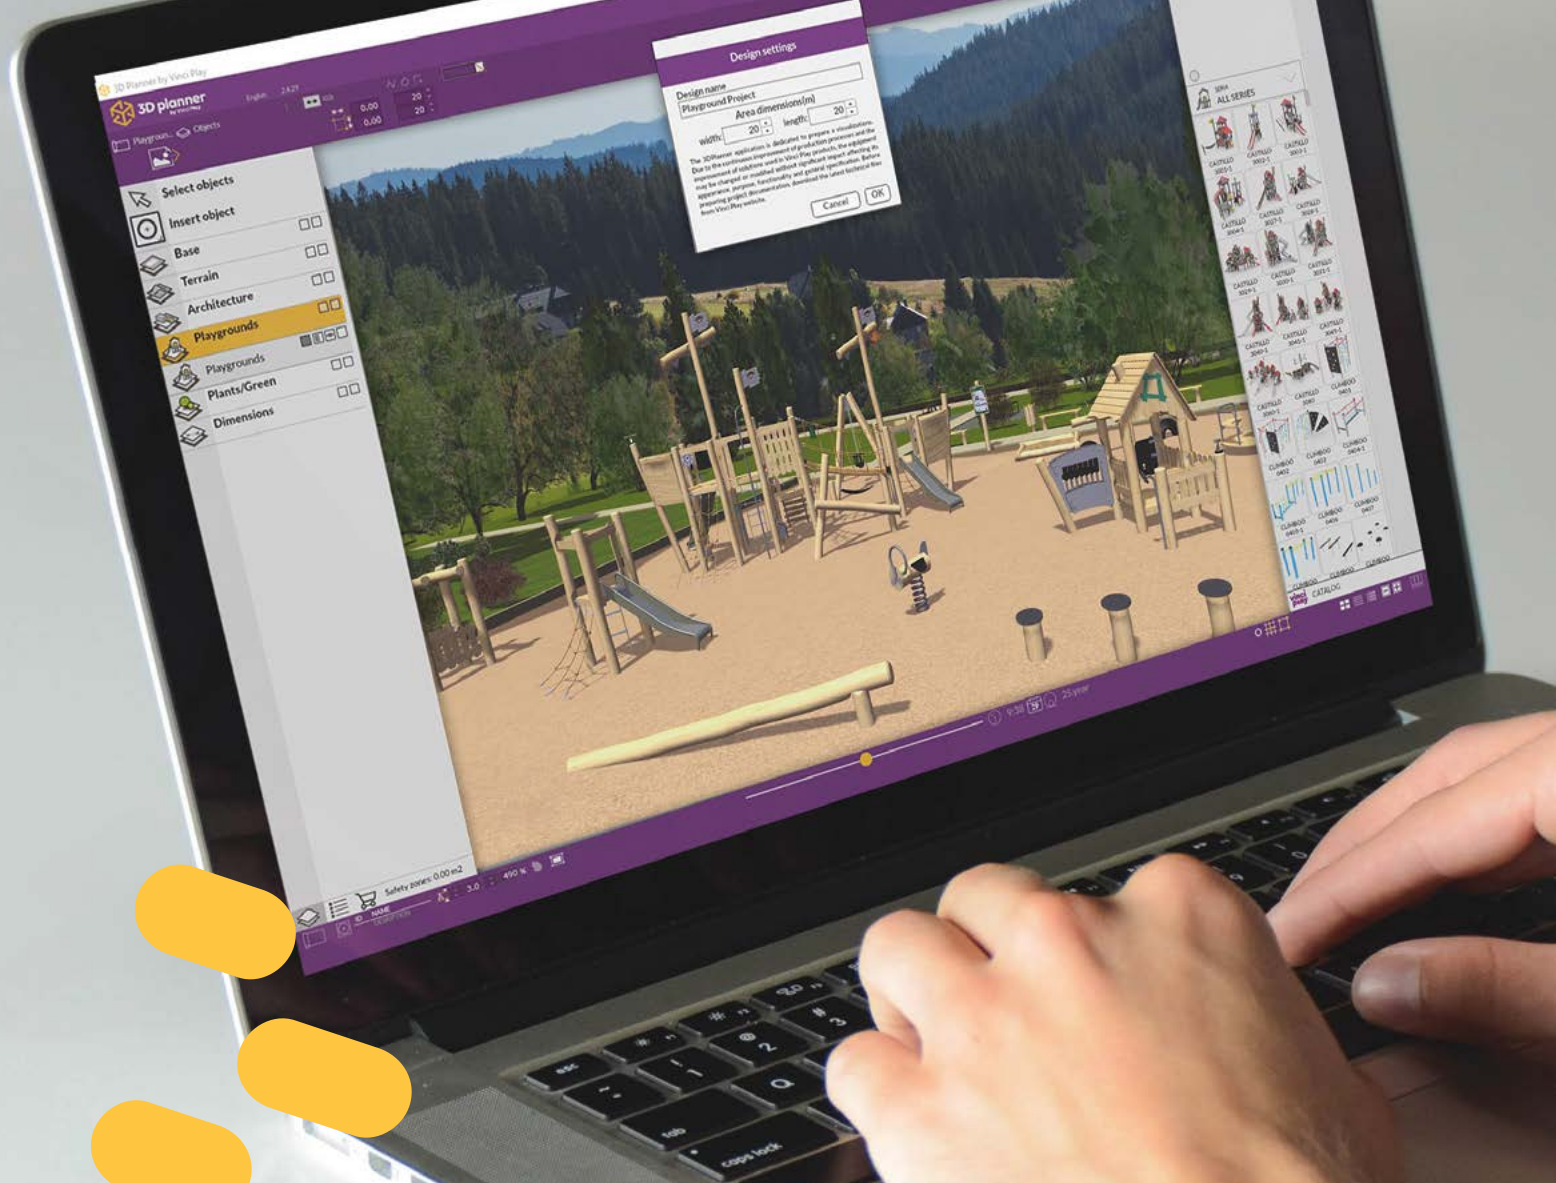

to our customers being able to restore any damaged or worn-out components. We guarantee the availability of spare parts throughout the entire period of use and always provide support and advice on replacing and repairing devices. Orders for most spare parts are fulfilled within 48 hours. Spare parts or their equivalents are also available after the warranty has expired; we ensure their availability for up to 10 years.

# Design your playground!

Planning play spaces has never been easier.

Our original online tools enable the quick creation of concepts tailored to the space and user needs. 3D visualization allows you to see the final result and simplifies the configuration of your planned set. Our applications' specialized interface is designed to make

work as easy as possible. This allows you to arrange your space in a simple and intuitive way, tailored to each user's skill level.

Watch movie:

3D Planner

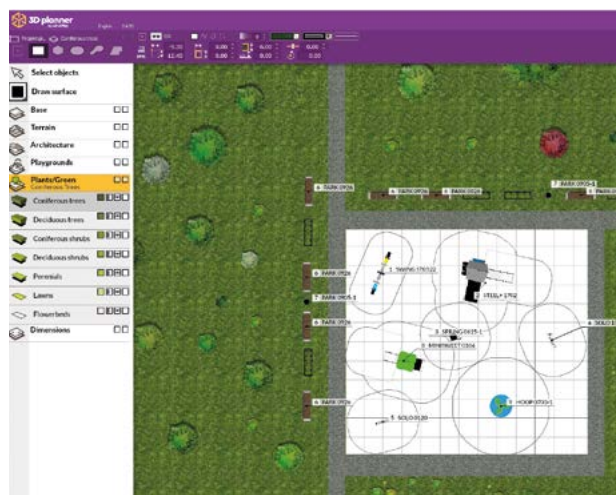

Unit3D is an advanced tool created specifically for clients interested in unconventional solutions. The application provides complete control at every design stage, while offering speed and ease of use, even for those without design experience. Thanks to 3D render, users can easily see what their customized product will look like before implementation begins.

The visualization shown is for illustrative purposes only and differs from the design presented in the Unit 3D Creator.

Design a functional and safe playground with the 3D Planner application. See what your new playground will look like. Our 3D application will calculate the area needed for the installation of the Vinci Play equipment based on their safety zones.

# Recycled, a better way!

Watch movie:

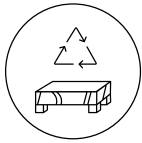

Recycled  
Materials

Caring for the future of children and future generations, the idea was born to replace our classic elements of play equipment construction with post-consumer recycled materials. As a result, we have created a group of Recycled products based in 100% on recyclable materials that lower carbon emission.

Towers, slides, ladders, sandboxes, educational panels, spring rockers, swings and complementary elements, such as benches and litter bins - all produced with the use of recyclable materials.

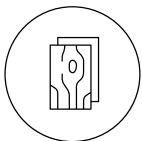

### Composite posts

Recycled posts made of an innovative material made of used clothing and foil. The characteristics include, among others that this material: does not corrode, is durable as steel, resistant to algae formation, does not absorb water and is resistant to UV radiation.

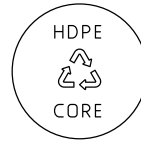

### Recycled HDPE panels

Roofs, side panels and moving elements manufactured from ocean waste – fishing ropes and nets. With high durability and resistance to weather conditions these panels allow to create a playground with almost 100% recycled elements, contributing to a healthier environment for future generations.

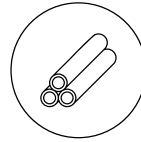

### Plywood platforms

Anti-slip and waterproof platforms and climbing walls made of plywood coated with a hot-pressed phenolic film with a honeycomb surface imprint – it offers increased resistance to abrasion, mechanical damage and chemical agents. It is PEFC-certified.

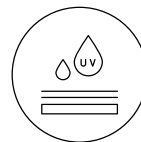

### HDPE with recycled core

A high-quality material resistant to atmospheric agents, i.e. it is waterproof, resistant to frost, UV radiation or moisture. We use three-layer plates (a black core is made of 100% recycled granulate) for the production of various panels, roofs and other playground components.

### Stainless steel bars

AISI304 or AISI316 stainless steel bars are used as handrails, fireman's poles, climbing frames, ladders. With a smooth surface, it is completely weather-resistant, thus ensuring its long life span.

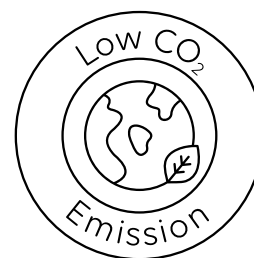

### HPL elements

HPL panels are being used as supplement in various types of equipment, harmonising with recycled style of the series. This laminate is resistant to chemical and biological factors and weather conditions.

# wooden recycled

## Wooden now in Recycled option!

The WOODEN series now available in a new material version. Instead of painted wood construction, products are available in the Recycled option.

Various educational and sensory panels combined with moving elements will bring children a lot of joy and arouse great interest.

The environmentally friendly Recycled series devices stimulate the child's comprehensive physical development and also allow a large group of children to play together. Thanks to this, the child learns to establish relationships with peers and cooperate in a group.

## Fun for the youngest!

The SOLO series is a paradise for preschoolers, ruled by sand, water, sound and movement.

Free fun develops natural creativity, encourages experimentation and unleashes imagination and the desire to cooperate with other children.

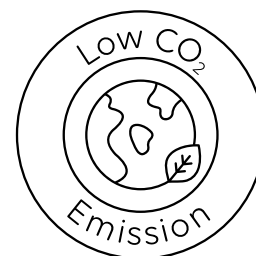

Numerous manual and sound elements and educational panels stimulate the senses in a comprehensive way, stimulating the child's intellectual development.

# climbo recycled

## Climb, crawl and pull-up

The CLIMBOO series develops the skills and coordination of older children, increasing their self-confidence.

Various ladders and climbing walls of varying degrees of difficulty strengthen muscles and teach the child to concentrate and maintain balance.

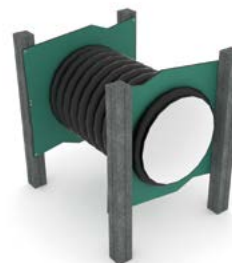

This series is an ideal place to organize games with elements of competition, where exciting physical challenges are accompanied by maximum safety.

# spring recycled

## Rocking and swaying

The SPRING series is pure energy on springs. It satisfies a child's natural need for free and carefree swinging.

Various vehicles and cheerful animals on springs encourage toddlers to energetically jump and swing in rhythm with body movements.

Spring riders and rockers, loved by children, allow for joyful play, which also brings huge benefits for their psychomotor development.

# hoop recycled

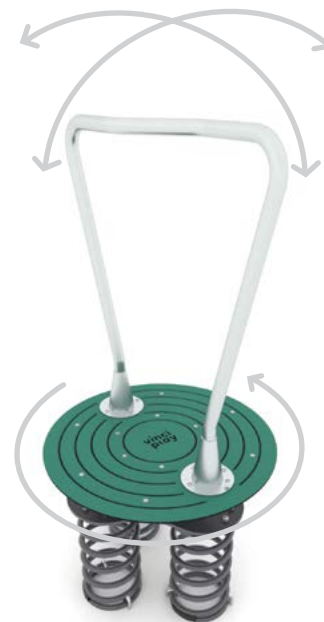

## Spin, spin!

The HOOP series consists of carousels and spinners that power the world of laughing children.

Spinning is an important activity in a child's development - it helps the nervous system mature, stimulates the sense of balance, strengthens the muscles and skeletal system.

# Small park architecture

The PARK series is an essential addition to a child-friendly playground.

Comfortable benches and tables, waste bins, information boards and fences provide comfortable rest for children and their parents and guardians.

The modern and aesthetic design of small architecture harmoniously matches the playground equipment.

New modular system for:

## Fun in harmony with nature

The Naturo series equipment is made primarily of natural glued wood, sealed with a protective impregnation in muted colors, and features safe slides, rope bridges, stable platforms, and many other play elements.

Their refined construction and unique design create a space where children can develop their imagination and activity. Ideal for schools, preschools, and public spaces, they guarantee durability, functionality, and comfort.

Naturo series

## All products

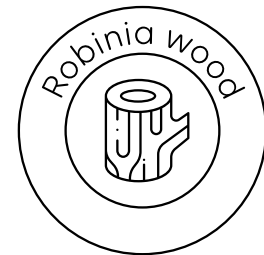

# robinia

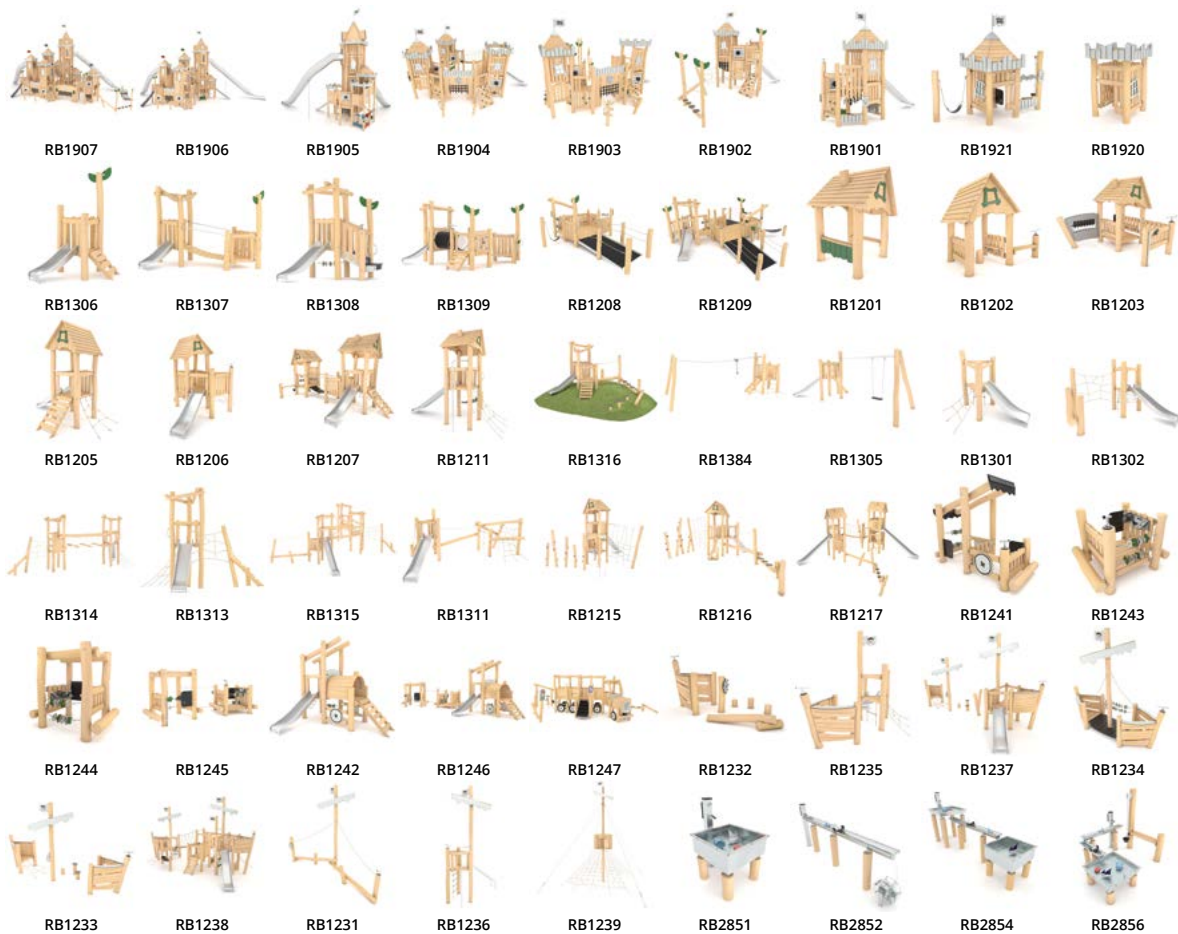

## Destination: nature!

The ROBINIA series consists of playground equipment made of natural raw material - Robinia acacia wood, the most durable wood found in Europe. This timber is characterized by natural, bright colours, has high weather resistance, does not require impregnation and can be anchored directly in the ground.

The unique Robinia series has been designed in a comprehensive way to enable creating of an offer containing all types of playground equipment: from tower sets with many climbing elements, through spring riders, carousels and swings, to small architecture.

# Higher, higher, higher!

The MAXX series are amazing towers that impress with their size and encourage physical activity.

These products reach up to 15 meters in height, creating some of the most impressive play structures.

The devices enable integration with other children during social play. Climbing on them is an amazing adventure, and the twisted tube slides additionally diversify the fun.

# jungle

## Wild adventure!

The JUNGLE series will allow you to climb to the heights and conquer the unconquered.

The best adventures will feel like they are happening right between the crowns of trees! Among green leaves, branches and colourful graphics, children can turn into adventurers and explorers.

High tube slides are fun - not only for small kids. The climbing elements are a challenge and encouragement to be active.

### All products

**space**

## Explore the universe!

The SPACE series is a fulfillment of childhood dreams of space travel.

The towers, standing up to 9.5 meters high and resembling space rockets, will lift children high above the ground. Colourful graphics, lots of activity and play elements, including tube slides made of the highest quality stainless steel, will not let anyone get bored.

### All products

# castillo

## Explore a castle theme!

Breathtaking castles, monumental towers, passages and hiding places made of rope elements, tube slides... And much more! Each child will be able to feel the atmosphere of medieval times, turn into knights and princesses, fight dragons, and lock the wicked in dungeons.

Castillo towers made of the highest quality materials guarantee entertainment for users of all ages.

# Material and components

At Vinci Play, we believe that every detail matters, which is why we use the highest quality materials and components with certificates and approvals to produce our devices, collaborating with world-famous suppliers. Thanks to this we can obtain a final product that will be not only aesthetic and functional, but also safe and compliant with applicable standards.

---

## Wood

---

Laminated wood with a cross-section of 90 x 90 mm. Top quality first-class wood: without knots, uniform colour, straight grain. Sanded, impregnated and varnished in a multi-stage production process. Secured from above with durable plastic overlays, and from below with hot-dip galvanised steel anchors, which protect the wood from direct contact with the ground, and thus prevent the development of rot and extend its life.

---

---

## Robinia wood

---

Robinia - black locust is the most durable wood found in Europe. It is characterised by a light, warm colour. It contains many oils that very well protect the material against weather conditions, naturally preserving, protecting against rotting processes and pests. It is distinguished by its exceptional hardness, resistance to moisture when in contact with soil. When sourcing wood, we make sure that it comes from European forests with the FSC® certificate and other controlled sources.

---

---

## Stainless steel

---

A structure made of AISI 304 or 316 stainless steel with an appropriately smooth surface finish is completely resistant to weather conditions, which ensures long service life. It is used to produce playground equipment, slides, tube slides, fasteners and chains.

---

---

## Steel

---

A steel construction of components is made of profiles with different cross-sections. Those steel components are galvanized before applying powder coating, in two options:

- powder galvanized, powder coated with UV-resistant paints with QUALICOAT certificate,
  - hot-dip galvanizing powder coated with UV-resistant paints with a QUALICOAT certificate,
  - steel structure: shot-blasted, galvanized and powder-coated with UV-resistant paints with QUALICOAT certificate.
- 

---

## Recycled composite

---

A structure made of composite, an ecological and innovative material derived 100% from recycled consumer waste, mainly clothing. This material is as durable as steel, does not absorb water, does not corrode or rot. It is also resistant to UV radiation.

---

### HEXA platforms

Platforms and climbing walls made of anti-slip and waterproof HPL board or optionally cross-plywood. They are covered with a phenolic film with a honeycomb imprint surface pressed hot, providing increased resistance to abrasion, mechanical damage and chemicals. They are PEFC certified.

### Recycled HDPE

High-quality polyethylene made 100% from recycled waste, including ocean waste such as fishing nets and ropes. Highly durable, environmentally friendly material, resistant to weather conditions: frost, moisture, temperature fluctuations, UV radiation. Used for the production of various types of panels, covers, roofs and other playground components. Available in green.

**Available colours:** ●

### HDPE

HDPE is a high-density polyethylene, resistant to weather conditions, such as moisture, frost and UV radiation. Three-layer boards with a black filling made of 100% recycled re-granulate are used to produce panels, roofs and other playground components.

**Available colours:** ●●●●●●●●●●

### HPL

HPL is a duroplastic pressure laminate. Cured polyurethane-acrylic resins create a highly resistant top layer, which makes the boards resistant to chemical and biological factors, UV radiation and changing weather conditions. This laminate is used to produce covers, panels, roofs and other playground components. It has a PEFC certificate.

**Available colours:** ●●●●●●●●●●

### Polycarbonate with print

Polycarbonate is a very durable material, with a transparency similar to glass, and at the same time twice as light and two hundred times more impact resistant. Additionally, it is resistant to weather conditions, including UV radiation and temperatures in a wide range. We use it to produce panels, covers and 3D spherical windows (portholes). Some elements are covered with a very durable double-sided print, also resistant to weather conditions.

### Ropes

16 mm diameter galvanized steel ropes covered with polypropylene or nylon material, connected with plastic, stainless steel or aluminum, resistant to UV radiation, abrasion and rot.

**Available colours:** ●●●●

---

### Lamellas

---

The polypropylene lamella jumping mat with a non-slip, ribbed surface ensures safety and comfort. Durable, abrasion- and erosion-resistant material ensures reliability and longevity of the trampoline.

---

**Available colours:** 

---

---

### Slides

---

Slides made of AISI 304 stainless steel, resistant to vandalism and external environment. Also available in fiberglass option. Side covers of the slide made of HDPE or HPL boards resistant to weather conditions, including frost and UV radiation.

---

### Stainless steel slides

---

Slides made of AISI 304 stainless steel, resistant to vandalism and external factors. Made with attention to every detail, with the highest quality welds, they are an elegant finish for playground products.

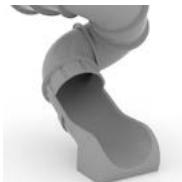

---

### Tube slides

---

Slides made of certified AISI 304 and AISI 316 stainless steel. Sheet thickness: 2.5 mm, diameter of 79 cm, sanded surface. The length of the slide exit depends on the length of the slide itself, the exit cap is made of a pipe with a diameter of 33.7 mm. Available variants: straight, curved or spiral (360 degrees). The tube slides meet the EN 1176 Standard.

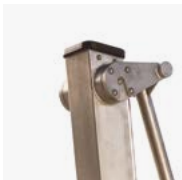

---

### PE tube slides

---

Straight, curved or spiral slides made of colorful, impact- and scratch-resistant polyethylene (PE). The internal diameter is approx. 75 cm. Available in various vivid colors and in different heights.

---

### Moving elements

---

Moving elements in the Fitness series are based on two solutions: a Swiss joint system - safe and durable, allowing for fully guided movement, resistant to overloads, weather conditions and vandalism, with mechanical stopping and a durable bearing system enclosed in a housing, thanks to which it does not require lubrication and maintenance. These parts ensure long service life of devices with moving elements.

---

---

**PP tunnels**

---

Double-walled tunnels resistant to distortion, made of PP (diameter 500 or 600 mm). Resistant to wear, vandalism and external factors.

---

---

**Climbing stones**

---

Colourful climbing stones made of durable composite resin with mineral fillers, resistant to abrasion and UV radiation.

---

**Available colours:** ● ● ● ●

---

---

**Anchors**

---

In wooden products, we use anchors made of hot-dip galvanized steel, protecting the wood from direct contact with the ground, which prevents the development of rot, thus extending the life of wooden products and ensuring their long-term use.

---

---

**Chains**

---

Certified chains made of AISI 304 and AISI 316 stainless steel. Calibrated to protect fingers from getting pinched. Safety plugs  
Rubber or polypropylene safety plugs protect steel profiles from weather conditions and protect children from injuries.

---

---

**Protective plugs**

---

Rubber or polypropylene protective plugs protect the main construction profiles against weather conditions and children from injuries.

---

---

**Screws**

---

Screws made of AISI 304 and AISI 316 stainless steel or galvanized and secured with durable polyamide caps, protecting against contact with the external environment. Thanks to this, our devices are resistant to wear and tear or changing weather conditions.

---

# Colours

Different colours of play panels, ropes or construction elements allow our products to fit into various environments. Vinci Play products are aesthetic solutions tailored to the customer's expectations. When choosing colours, we pay special attention to functionality, the visual aspect, and matching the product to users' needs.
