Prepared by: Mirshal L., Founder of Brew 9

Updated on 1st April 2024

BACKGROUND

- Brew 9 started selling cold brews to the coffee community 7 years ago in Brunei
- Cold brew market has now steadily grown into a neighbourhood cafe in Shah Alam
- Sold **over 100,000 bottles** of cold brews to date

GOALS

- Consistency in flavours
- Constant R&D for new flavours to expand the range of flavours
- Roasting our own coffee beans
- To become sustainable and serve the community its needs

WHY COLD BREW?

- 'Grab & Go' concept
- High caffeine
- Low acidity

HAND BREW

COLD BREW USES 2
TECHNIQUES:

A) IMMERSION

B) DRIP

The process requires science in accuracy and precision.

The caffeine level is in proportion to the brewing time. Cold Brews are high in caffeine because they are brewed for 24 hours and they have lower acidity because the oils are filtered thoroughly after the brew.
