

# **Academic Questions & Shortfalls**

## **What about SEL and CIS**

### **Why are more tax dollars resulting Declining Academic Outcomes**

Effectiveness in student learning with the dollars. Where are the numbers that prove SEL and CIS programs are in fact helping students in their academic success? And what is the price tag being placed on student success. How much more must be spent to achieve it?

### **SEL is Not Necessarily Needed by All SKSD Students**

SEL is not needed for all, but many students are losing valuable academic time because of the unfortunate circumstances of others.

### **Why No reductions in Student Absenteeism**

What is the percentage rate of absenteeism within the district and what is the percentage of students in which CIS has been able to keep in school due to their services?

### **CIS Reading Programs Rates of Success**

CIS has reading programs for the kids- what is the student success percentage rate with these programs?

### **CIS at SKSD is Not Illegal**

There's nothing illegal about what the district is doing with CIS. It's always a loophole no matter how fine the line is.

### **Family Separation Not A Goal of CIS**

CIS's goal is not to separate families and they only make reports when needed be cause a child told them they were being abused. They aren't actively looking for this; they're actively trying to help kids in need succeed. It's no different when a person in the community calls CPS on another person or when a person calls the cops and makes accusations. Can people/kids lie? Sure. But that's why an investigation initiated. If parents are doing the right thing, they have nothing to worry about and need to stop fear mongering others. Again, it shouldn't be at the taxpayer's expense to pay for CIS and if it is, then the district needs to list them instead of using happy word salad that sounds nice.

## **SKSD's Academic Progress Report Card Remains Stalled**

SKSD isn't expected to increase its academic report card to a mere 75% until 2027. How are SEL & CIS programs assisting with these factors if they're helping with academic proficiency?

## **OSPI Priority is Not K-12 Education**

The state's priority is not K-12 education. This was stated by SKSD Admin Official in February 2023. And with Governor Elect Ferguson and OSPI Superintendent Reykdahl, it's just going to get worse for public education as long as they're able to collect \$\$\$ in the name of "special education" which will continue to grow if they and the parents allow their kids to transition as it puts them un the protected class of mentally disabled. **AKA:**

## **Munchausen Syndrome by Proxy**
