INFRASTRUCTURE

REGULATIONS

DEPARTMENT OF MEDICAL CANNABIS PROGRAM

REGULATIONS Board of Pharmacy, Dept of Health, or appropriate Department Of Agriculture regulatory agencies that currently regulate GA entities **Current Controlled Vertically-Integrated Cannabis Companies Substance Labs** (registered w/ GA) **OPERATIONS** Dispensing / Manufacturing / Cultivation **Testing** Delivering **Processing**

Vertically-Integrated Cannabis Companies

Minimum Initial Number Required, with Expansion at Discretion of Regulator

KEY DISCUSSION POINTS

- 1. **Vertically-Integrated** vs Individual Licenses (potential for segmentation over time)
- 2. Number of Entities Authorized set an initial minimum based on population and medical indications; leave to **discretion of Department of Medical Cannabis** of when to expand and how much; similar to hospitals Certificate of Need
- 3. **For Profit** vs Non-Profit
- 4. Public Private Partnership vs **Private Ownership**
- 5. **Limited Ownership** One Entity per License / One License per Entity

OTHER KEY CONSIDERATIONS

OTHER KEY CONSIDERATIONS

- Florida initially regulated entities to the letter of their applications; however, with changes of laws and growth in the market those applications are no longer as relevant to the current, on-going operations.
- Georgia must develop base level regulations similar to that of agriculture food safety, and pharmaceutical compounding pharmacies, while also having the ability to monitor the "softer" elements of licensees for adherence to their commitments to the State. (i.e. economic development plans, community involvement, charitable contributions, etc.)

OTHER LEGISLATIVE CONSIDERATIONS

- Taxes and Appropriations
- Application / Renewal Fees and Financial Health
- Pricing
- Personnel Requirements
- Inventory Tracking
- Security Requirements
- Open Access for Patients

The **table below** shows Colorado's gross medical and retail cannabis tax and fee collections by calendar year, beginning in 2014.

CALENDAR YEAR	TOTAL REVENUE
2014	\$67,594,323
2015	\$130,411,173
2016	\$193,604,810
2017	\$247,368,473
