

How To Measure Your RC Aircraft for a Custom Wiring Harness.

All measurements must be in inches

1. From the Receiver to the Wing Root / AMP Connectors
2. From the Wing Root / AMP Connectors to the Gears / Brakes
3. From the Wing Root / AMP Connectors to the Aileron
4. From the Wing Root / AMP Connectors to the Flaps

To check your wing root measurements, repeat steps 2, 3, and 4 with the other wing.

5. From the Receiver to the Tail Servos

If your RC Aircraft has a fuselage break, you must provide the following additional measurements.

6. From the Receiver to the Fuselage Break
7. From the Fuselage Break to the Tail Servos
