Prostatectomy Instructions Addendum (Cont'd)

Reach in as far as you can
while pushing my head down
into my neck
grab the brain stem
just below the pit
pull my cingulate cortex
off the prefrontal
but carefully
so we don't lose
any recent memories
or end up depressed.

Mind the cerebellum
strong and steady pull
until my spine
consolidates
epidermis goes inside
out
arms rise
trapezius compress.

Now
fold my arms at the elbow
bind them with some string
slide me down
onto my leggy sticks
nerves exposed
let tear ducts drip
then hang me out to dry.
